

Nano Resurrection Serum

Consumable (Injection)

Cost: 10,870 ¢

Use Limit: Once per character per in-game month, unless flushed at a certified medical facility.

Description:

A sleek, translucent injector vial filled with glowing golden nanogel. Upon injection into a recently fallen body, the nanites swarm through neural and muscular pathways, rebooting vital functions, rebuilding cellular collapse, and forcibly yanking the soul back into its vessel—if it hasn't drifted too far.

Manufactured under ultra-black Karmahard licensing and distributed only to military medivacs and sovereign enclaves, these syringes are often guarded more jealously than plasma cores.

Effect:

As an **action**, inject the serum into a creature that has died within the last **60 seconds**. That creature immediately returns to life with **1 HP**, stabilizes, and becomes conscious.

- The subject suffers **1 level of exhaustion** and cannot regain hit points above half of their maximum for **1 hour**.
 - All death saves are reset.
 - Soulbinding technology enforces a “**one resurrection per month**” rule: a creature cannot benefit from **any** Nano Resurrection Serum again until 30 in-game days have passed **unless** they undergo a full **flush & neural reset** at a certified med-clinic or resurrection facility (**cost: 2,500–5,000 ¢**, varies by region).
-

Notes:

- If injected more than 60 seconds post-death, the nanites burn out and the serum is wasted.
- The injection has no effect on creatures missing vital body parts (e.g. decapitated, pulped) unless 75% of the body remains intact.

- Does not cure diseases or poisons already present upon death, though it may delay effects for 1d4 hours.

City Eater Genoframe (Juvenile Class)

Source Organism: Omega-Class Urban Devourer (mechanical apex predator originating from the Rustmarch Purge)

Stat Boosts:

- +3 Strength, +3 Con
- +2 AC (from hardened alloy plating)
- +150 maximum hit points

Integrated Features

1. Steelshaper Protocol (Enhanced)

*As an action, you may mold nearby metal into a devastating **Mech-Weapon**, either handheld or limb-mounted.*

- *You create a melee or ranged weapon formed from junk, scrap, or battlefield detritus.*
- *These weapons count as magical and use your Strength or Dexterity (your choice).*
- *They deal damage **one dice larger and +2 die (3 die for two handed weapons)** than their base weapon type.*
(e.g., longsword (1d8) becomes 3d10; greatsword (2d6) becomes 5d8; shortbow (1d6) becomes 3d8)
- *You may summon **two** such weapons at a time. They last 1 hour or until dismissed.*

2. Omega Beam Lance (Recharge 3 rounds) (Twice per short rest)

Action – *Unleash a titanic arc-beam from your chest or mouth emitter.*

- **Range:** 100 ft. line, 15 ft. wide

- **Targets:** All creatures in the area must make a Dexterity saving throw (DC = 8 + proficiency + Dex).
- **On fail:** Take **15d20 + 80** radiant or force damage (your choice).
- **On success:** Half damage.
- Creatures reduced to 0 HP by this beam are disintegrated if they have 100 HP or less.

3. Metallophage Engine (Absorption Core)

Bonus Action – Consume nearby scrap or slain metallic foes.

- You may target a destroyed construct, armor, or exposed metal source within 10 ft.
- Absorbing grants **temporary HP equal to 5 x your level(Max 500)**, and **+1 AC(Max 5)** for 15 minutes.
- You can absorb metal this way a number of times equal to your Constitution modifier per long rest.
- If the metal source was a CR 15+ enemy or larger item, the AC bonus increases to **+2**.

4. Wyrmspike Chassis (Passive)

- Unarmed strikes now deal **2d10 slashing or piercing** (your choice), and count as magical weapons.
- You count as one size larger for carrying, pushing, or grappling.
- You can move through and on industrial wreckage without penalty.

Pyroclast Simian Frame

Source Organism: Cinderback Fire-Ape (elemental chimera of molten fury)

Stat Boost:

• **+2 Strength, +2 Constitution**

Effect (upon integration):

- **Magmahide:** You gain resistance to fire damage.
- **Inferno Smash (Action):** Slam the ground to unleash a 15-ft radius blast of flame. Each creature in the area takes 9d6 fire damage (Dex save

for half, DC = 8 + your proficiency bonus + your Constitution modifier).

- **Ember Lash (Passive):** When you hit with a melee attack, nearby creatures (within 5 ft) take 1d8 fire damage as scorching embers fly off your strikes.

Bonus Action (1/Short Rest):

- **Primal Heat:** You radiate a wave of volcanic warmth. Allies within 10 ft gain +1d4 fire damage on their next attack and resistance to cold damage until the start of your next turn.

Deatheater Genoframe

Source Organism: Low-tier spectral predator

Stat Boost:

- +1 Strength, +1 Dexterity,

Effect (upon integration):

- **Vital Surge:** Your maximum hit points increase by 75.
- **Death's Ledger:** You gain 2 additional death saving throw failures and successes (you now track up to 4 failures and 4 successes before stabilizing or dying).

Passive Traits:

- **Vengeful Pursuit:** If you take damage from a creature equal to or exceeding ¼ of your current hit points in a single instance, you gain movement speed equal to half your walking speed toward that creature until the end of your next turn.

1. **Stigmata of Golgotha**

Origin: Crafted from a sliver of the True Cross nail and infused by early Christian mystics in 2nd-century CE Cappadocia.

Appearance: A pair of slender iron studs, each etched with a tiny crown of thorns, suspended on fine gold chains meant to rest over the wearer's palms.

Lore: Whispered of among monastic orders, these studs were said to bleed faintly when the bearer defied injustice. Lost to history during the Iconoclast controversies, they reappeared in a secret reliquary beneath New Rome—rumored still to grant visions of sacrifice to those who bear them.

2. **Palm-Marks of Saint Francis**

Origin: The imprinted palm-prints miraculously branded on the hands of Saint Francis of Assisi, 13th-century Italy.

Appearance: Two oval resin inlays, each capturing a faint impression of a human hand, set into blackened titanium cuffs that hug the wearer's wrists.

Lore: Smuggled out of an abandoned Umbrian hermitage during the Black Death, these cuffs are said to throb with a gentle warmth when the wearer performs true acts of mercy. Legends claim they once guided Francis to heal plague victims—now they lie dormant until called upon in dire need.

3. **Crown-Spikes of the Martyrs**

Origin: Forged from dozens of rusted iron spikes recovered from early Roman arena grounds.

Appearance: A circlet of interwoven steel and bone fragments, each spike curved inward, resting atop the wearer's brow like a grim halo.

Lore: Collected by persecuted Christians fleeing north, the circlet was later consecrated in a hidden Alpine chapel. It is said that those who don it bear the weight of countless martyrs' faith—and may glimpse the final moments of the unjust slain. Though its powers are feared, the faithful regard it as a somber reminder that suffering can transcend into hope.

4. **Heart-Shard of Saint Cecilia**

Origin: A crystalline fragment purportedly carved from the heart of Saint Cecilia's statue in 5th-century Rome, said to resonate with divine harmony.

Appearance: A palm-sized, translucent ruby crystal set in a delicate silver filigree locket, engraved with musical notation from ancient hymns.

Lore: When Rome fell to invaders, her shrine was looted—and the Heart-Shard vanished for a millennium. Rediscovered in a hidden crypt beneath Notre Dame, it's whispered that those who carry it hear celestial music in moments of despair, and that their words can soothe even the most frenzied mind.

5. **Veil of the Seraphim**

Origin: A fragment of silk from the "Veil of Veronica," blessed by crusader clerics in 1200 CE and said to bear the imprint of Christ's visage.

Appearance: A narrow, iridescent silk band embroidered with gold thread into stylized seraph wings—worn across the eyes like a blindfold.

Lore: Smuggled out of the Holy Land by Templar knights, the Veil reemerged centuries later in a Venetian convent. Legend holds that those who don it “see” through the eyes of angels—perceiving truth and hidden evils—though the visions can leave them haunted by humanity’s darkest sins.

6. **Pilgrim’s Nail of Santiago**

Origin: One of the original iron nails hammered into the Cross, brought to Spain by a 4th-century pilgrim and later enshrined at Santiago de Compostela.

Appearance: A single, blackened iron nail, encrusted in scallop shell-patterned bronze, suspended from a chain of pilgrimage medals.

Lore: Carried by generations of wayfarers, its legend grew with each restored fresco and healed leper along the Camino. In the Convergence era, it surfaced in a smuggler’s cache beneath the city, and some claim its presence can guide lost souls home—both in body and in spirit.

7. **Stigmata of Calvary’s Wounds**

Origin: Believed to be drops of Christ’s own blood that fell upon a Roman soldier’s palm as he witnessed the crucifixion.

Appearance: Two overlapping, translucent patches of skin preserved on obsidian plates—each faintly reddened, veins visible beneath the surface.

Lore: Buried in a secret chamber beneath Jerusalem’s Church of the Holy Sepulchre, these palms resurfaced during a covert salvage by Obeliska Global engineers. Those who press their own hands against the plates claim to feel the searing pain of salvation.

8. **Crown of Pierced Brow**

Origin: Fragments of skin and tissue taken from Christ’s brow where the Crown of Thorns pressed in.

Appearance: A thin strip of preserved dermis, encased in a circlet of angelic steel, its edges still splintered with thorn-shapes.

Lore: Smuggled out of Constantinople by a ragtag order of warrior-monks, it vanished for centuries until discovered fused within a Machina’s cranial implant. Whispers say it bestows unbreakable faith—at a terrible price.

9. **Riven Footprints of Golgotha**

Origin: Impressions left in rock by Christ’s feet as he carried the cross.

Appearance: Two small, palm-sized indentations in a shard of hillstone, embedded within a titanium-bronze frame.

Lore: Unearthed by NoxTech dream-diviners in the “Dream Layer,” the Prints vanished into myth again until agents of Genovolve Initiative extracted them from a collapsed cave. Some claim stepping into the bas-relief grants liminal passage between suffering and transcendence.

10. Vein of the Sacred Side

Origin: A segment of the lance-wound's vein, preserved by early Christian healers.

Appearance: A thin, coiled ribbon of organic tissue, kept moist in a fluid-filled crystal ampoule, the blood still fresh to sight.

Lore: Secreted away by Templar alchemists and later cannibalized by occult collectors, the Ampoule was nearly lost to war. It surfaced in a Karmahard black-ops cache, its fluid rumored to cure any ailment—if one can endure its agonizing touch.

11. Heart-Shard of the Martyr

Origin: A splinter of Christ's own heart, said to have been removed by an angel at the moment of death.

Appearance: A small, black obsidian fragment veined with glowing crimson lines, mounted on a halo of pyrex-steel.

Lore: Carried by a secretive order of mystic engineers, the Shard was lost in the Convergence's early days. It was recently reclaimed from a collapsing sanctum on the Verge—its pulsing light drawn to those who seek redemption in the blood-soaked wastelands.

Handprint of the Buddha

Origin: The sacred palm impressions attributed to Siddhārtha Gautama, left in the soft clay of Jetavana Monastery.

Appearance: Two recessed handprints in a jade-green marble slab, the lines of the palm faintly glowing with inner light when viewed in moonlight.

Lore: Secreted away by Theravāda guardians during centuries of persecution, the marble was lost at sea and only recently dredged from the ocean floor by Obeliska Global divers. Monks claim meditating before the prints brings ecstatic clarity—and visions of the Enlightened One's final sermon.

Shroud of the Thousand Kami

Origin: A fragment of the ancient cloth said to have been woven by Shintō priestesses to bind the spirits of dozens of nature deities.

Appearance: A ragged swath of silk painted with swirling vermillion and gold patterns—each motif threads a different elemental spirit.

Lore: Hidden within a mountain shrine above Kyoto, the Shroud vanished after a massive quake. Recovered by NoxTech field agents using astral-view drones, it now resides in a corporate vault—rumored to hum softly when winds shift or thunder rolls.

Spearpoint of the Valkyr

Origin: The iron-tipped lance used by a legendary Valkyrie to gather fallen heroes on

the fields of Gjallarbru.

Appearance: A narrow, blood-etched spearhead of meteor-iron, its haft long since disintegrated, the tip still warm to the touch.

Lore: Thought destroyed in the Ragnarök fires, the point was discovered embedded in a glacier in Scandinavia and sold to a Genovolve geneticist who believed it held instructions for warrior-gene splicing. Locals say that at dawn, faint echoes of battle cries drift from its edge.

Torah Parchment of the First Light

Origin: A vellum scroll fragment written by the scribe Ezra, containing the earliest verses of Genesis.

Appearance: A single strip of ancient animal hide inscribed in faded Paleo-Hebrew, sealed in a laminated carbon-glass tube.

Lore: Smuggled from Jerusalem in the Second Temple's final days and hidden in a desert cave by Essene monks, it later surfaced in the black market before ARX Protocol analysts secured it as a data-anchor for their predictive algorithms. Scholars insist reading it aloud still summons a faint aura of creation itself.

Relic of Mithraic Tauroctony

Origin: A chipped fragment of the ceremonial altar stone used in the secret Mithraic rites, depicting the slaying of the sacred bull.

Appearance: A trapezoidal piece of calcite bearing a low-relief bull's flank pierced by a ritual dagger, with minor drips of ochre pigment preserved in its grooves.

Lore: Buried beneath Roman barracks in Londinium and forgotten for millennia, it was unearthed during an Obeliska Global subway expansion. Initiates whisper that standing before the stone before battle can invoke the ancient god's favor—yet many who try walk away shaken by visions of the cosmic bull's death throes.

◆ **Antimatter Greatblade**

Very Rare

A sleek, ultrasteel greatsword whose edge contains a seam of volatile antimatter. In battle its blade hums with suppressed energy, ready to rend both flesh and armor.

Base Statistics

- **Weapon Type:** Martial melee weapon (greatsword)
 - **Damage:** 2d12 slashing
 - **AI Assistant +6 to hit**
No AI assistant +3 to hit
 - **Properties:** Heavy, Two-Handed
 - **Weight:** 8 lbs
-

Abilities

Activate Antimatter Edge (Bonus Action, 1/Short Rest):

You channel antimatter into the blade's edge. For your next **3** successful attacks within 1 minute, each strike deals an extra **2d12** force damage.

Residual Entropy (Passive):

On a hit, the target's resistances to slashing and force damage are ignored for that attack.

Plasma Monsoon Blade

Rare

A translucent alloy blade channeling superheated plasma in swirling storm-like vortices along its edge.

Base Statistics

- **Damage:** 2d12 slashing (plus 1d12 fire)
- **To Hit:** +6 / +3
- **Properties:** Heavy, Two-Handed, Special (see below)
- **Weight:** 8 lbs

Abilities

- **Monsoon Unleashed** (Action; Recharge 5–6)
Sweep the blade in a 15-ft cone. Each creature makes a Dex save (DC 8 + Prof + Dex) or takes **6d12** fire damage (half on success).
- **Plasma Sheath** (Bonus Action; 1/Short Rest)
For 1 minute, on each hit you deal an extra **1d12** fire damage and ignore resistance to fire.
- **Overheat Vent** (Passive)
When you score a critical hit, the sword erupts in a flash—all creatures adjacent to you take **1d6** fire damage.

◆ Nanite-Edge Warbrand

Very Rare (requires attunement by a martial class)

A living blade whose edge is comprised of programmable nanites that reshape on command.

Base Statistics

- **Damage:** 2d12 slashing
- **To Hit:** +6 / +3

- **Properties:** Heavy, Two-Handed, Adaptive
- **Weight:** 7 lbs

Abilities

- **Bladeform Shift** (Bonus Action; 1/Short Rest)
Choose a mode for the next minute:
 - **Shred Mode:** On hit, target bleeds for **1d12** damage at the start of its turn (Con save ends).
 - **Break Mode:** On hit, target's AC is reduced by 2 until the end of your next turn.
- **Nanite Repair** (Passive)
At the start of your turn, if you have no more than half your HP, you regain **1d8** HP as nanites patch wounds.
- **Swarm Strike** (Action; Recharge 5–6)
Your swing releases a cloud of nanites in a 10-ft radius: creatures must make a Con save (DC 8 + Prof + Dex) or take **3d10** slashing as nanites devour armor (half on success).

Lets clean up this magic item we made awhile back. Can we properly sort out the firing modes? Its a bit confusing seeing that Suppressive stream seems to not mention that it plants you down into that position. Also what was the point of 12 round burstx3d10 if theres no feature saying you can shoot 12 bullets anyway.

Lets do it like this

- Clean up and create a section called Firing modes that still includes
hyper velocity burst (burst fire mode with penetration)
Cover Fire burst (Spray and pray AOE attack)
Rapid Fire Burst (Strong Single target)

One more mode that you feel is appropriate

“Iron Coffin” Belt-Fed Devastator

Legendary Heavy Machine Gun (requires attunement by a Wasteland Operative with heavy firearms proficiency)

Overview

A WWII-era MG42 reimagined as a self-powered, arc-driven machine gun. Its receiver is grafted onto a scorched tripod mount with a built-in shock dampener. The feed belt is digitally encoded to filter “scrap rounds” (salvaged casings) into high-velocity gauss-charged projectiles. Its sustained fire can tear through infantry and burn holes in power armor alike.

Base Statistics

- **Type:** Heavy Machine Gun
 - **Damage/Ammo:** Varies by firing mode (see below)
 - **Become Prone for the round when Reloading**
 - **Range:** 50/300 ft.
 - **Properties:** Ammunition, Heavy, Two-Handed, Reload (tactical belt, 50 rounds)
 - **Weight:** 30 lbs (with tripod)
-

Attunement

- 1-hour calibration and prime with 10 rounds of standard ammo (no damage dealt).
-

Firing Modes (Magazine size 16)

Each mode specifies its own rounds expended and effects. You must be planted (feet stationary) to use any sustained or burst mode.

Mode	Rounds Expended	Effect
Aimed Shot	1	Action: Make one attack vs. a single target within 500 ft
On hit: 4d12 Piercing ignores		Make a single attack roll with

piercing resistance		advantage against one creature you can see.
this attack ignores resistance to piercing damage		
Tech-Mark Bonus: +1d12 to the primary target if marked by Tech-Hunter's Mark.		
Hyper-Velocity Burst	3	Action: Make one attack vs. a single target within 300 ft.
• On hit: 9d10 piercing.		
• Penetration: Creatures in a 15-ft line beyond take 4d10 piercing (no save).		
• Tech-Mark Bonus: +3d10 to the primary target if marked by Tech-Hunter's Mark.		
Cover Fire Burst	8	Action: Sweep a 30-ft cone within 300 ft.
• Each creature must make a Dex save (DC 14 + Prof + Dex).		
• Fail: 9d10 piercing, Success: half.		
• You cannot move while sweeping; you remain planted.		
Rapid Fire Burst	6	Action: Focus on one target within 200 ft.
• Make one attack; on hit: 12d10 + (2 × your Dex mod) piercing.		
• Ignores cover. Ideal for single-target knock-down.		
Tracer Wall	10	Action: Lay down a 40-ft line of tracer rounds in a 5-ft-wide path within 200 ft.

• Each creature that enters or starts its turn in the line makes a Dex save (DC 14 + Prof + Dex) or takes 15d10 piercing and is slowed (half speed, no reactions) until the start of its next turn.		
--	--	--

Features

Kinetic Feedback Shield

While firing in any mode, you gain resistance to nonmagical ranged attacks.

Whenever you reduce a hostile creature to 0 HP with the Iron Coffin, you gain temporary HP equal to half the damage dealt (rounded down) To a maximum of half your MAX HP

Last Bulwark Barrage (1 long rest)

When you drop below 30% of your max HP, you can use a bonus action to unleash a 360° gauss storm. For one round, every creature (friend or foe) within 150 ft. must make a Con save (DC 8 + Prof + Con) or take (Remaining ammo in magazine D6) + 8d10 piercing (half on success). Allies are immune if they begin their turn **willingly** within 10 ft. of you.

Suppressive Stream

Stream Fire (Overwatch): As an **action**, set the Iron Coffin to a sustained belt feed: for **1 minute**, you may use your **bonus action** each turn to pour lethal gauss shots at a point within 300 ft. Each creature in a **30-foot cone** must succeed on a **Dexterity save** (DC = 8 + proficiency bonus + Dex modifier) or take **8d10 piercing**. On a success, half damage. You cannot move while sweeping. After 1 minute, you must spend 10 minutes clearing the feed system (no firing).

Caution & Tactics

- **Overheat Risk:** After two consecutive turns using Burst, Cover Fire, or Tracer Wall, make a DC 17 Int save or the coils overheat: you are stunned until your next turn and the weapon is inoperable until a short rest.

- **Deployment:** Break enemy lines with Hyper-Velocity or Rapid Fire. Hold chokepoints with Cover Fire or Tracer Wall.
- **Desperation:** Last Bulwark Barrage clears swarms but leaves you exposed—ensure friendly cover or rapid extraction.

Photon Web Dispenser

Consumable (1 charge)

Description: A palm-sized canister of translucent filaments woven from energized photonic fibers. When deployed, the canister hisses, ejecting a glowing web that crackles with static before hardening into a nearly invisible restraint.

Usage: As an action, you throw the dispenser up to 30 ft. or fire it from a net-pistol. On impact, it releases a 10-ft. cube of webbing.

Effect:

- **Restraint:** Each creature in the area must succeed on a DC 13 Dexterity saving throw or become **restrained**. A restrained creature can use its action to make a Strength check against DC 13, breaking free on a success.
- **Energy Discharge:** Creatures that fail the save take 2d6 lightning damage as the web “shocks” their limbs.
- **Dissipation:** The web dissolves harmlessly after 1 minute or when its charge is expended.

CREDIT COST: 1400¢

Projected Shield Belt

Wondrous item, rare (requires attunement)

A sleek band of interlocking alloy plates and refractive emitters worn around the waist. When active, it surrounds you in a translucent energy bubble.

- **Constant Barrier.** While attuned, you have 200 temporary hit points that behave as a constant protective buffer. These temp HP absorb damage before your normal hit points.
- **Recharge Protocol.** If you go a full uninterrupted hour without taking any damage, the belt's emitters automatically recharge you back up to 200 temporary hit points.
- **Forced Cooldown.** If the shield bubble is fully depleted (you drop to 0 temp HP), the belt's recharge protocol is disabled for 1 hour, after which it may begin recharging again once you remain unharmed for another hour.

CREDIT COST: 12300¢

Thermal Breach Charge

Adhesive demolition gel

- **Focused Cut:** Applied to a 5-ft² surface, blasts a 3-ft wide breach through metal or composite plating in 6 seconds; deals 8d8 fire damage to anyone within 5 ft (Dex save half)
- **Safety Lock:** Must remain powered by your neural interface to arm, preventing accidental detonation

CREDIT COST: 5800℄

“Welcome to the Cradle—your command nexus in Paradigm’s Reach, where every mission in the city and beyond finds its heartbeat. You’re our third and final strike team, and with two of you thawed fresh from the ice, I’ll spare you no detail. Normally I’d let veterans skip orientation, but this is your lifeline: pay attention.

First—transit. The Cradle hooks directly into the Military Light Rail. It’s a high-speed loop that whispers through every sector; your ride ends at the Rift Front, where the central Warp Gates fizzle with raw power. From there, you’ll link with your Pit Crew at Station Theseus-19 (190-0TH). Feed them live specimens or raw salvage, and they’ll ship it back here—or onward to Central—for processing. They also handle your vehicle rentals and convoy launches, so keep them stocked.

Next—the Beacon Array. You’ll carry three coded beacons: Red for live transport, Yellow for materials, Green for extraction. Ping Red when you’ve nabbed living prey; Yellow for scrap, ore, or carcasses; and Green when you’re pulling out your own recruits or mercs. Within the Cradle’s sphere, central bases answer those calls—warp, deliver, evacuate—unless you fancy your own smuggling network.

Beyond the Rift Front lie four danger zones, each more unforgiving than the last. In Low (Old Town), you’ll pick through sunken city blocks and half-collapsed towers. Medium (the Gray Quarter) smolders with ruins older than the Cradle itself and wide, echoing plazas. High (the Fringe) buckles reality—upside-down skyscrapers, vines choking steel, physics gone sour. And Uncharted (the Verge) is no man’s land, scorched by the Convergence, where even seasoned operators fear to tread. Each zone has a central base for resupply—and dozens of hidden safe-houses if you know where to look—but none are more than temporary refuge.

Warp Gates at the Rift Front are keyed to those bases. As long as a base holds, you can warp in and out—just don’t treat them like home. They’re forward outposts, manned by a skeleton crew in constant firefight with reality’s fractures. Our military defends them, but comfort is a luxury you can’t afford.

Back here in the Cradle, we quite literally build legends. Need augmentations, Genoframe installs, custom gear or attunements? We’ve got the labs, the black-ops shops, and the Market connections. Our rates beat most street-runners, and our gear rivals the Megacorps—though a handful of elite runners and boutique outfits can outmatch us, if you’re willing to pay their

premium. Anyway Your mission briefs, your gear manifest, even your meal tickets come from our operators—Ms. Vivienne will guide you to each department head.

That's your crash course. Learn it. Live it. Then go earn those credits, hunt those Genoframes, whatever drives you. Report back to me before you set foot in the Rift Front—because out there, the difference between legend and corpse is a detail we can't overlook. Now move out, and welcome to the real edge of the world. ”

Cradle Orientation:

Well for starters Welcome to the Cradle your hub for every operation inside Paradigm's Reach and beyond. You're theis cradle's third and final strike team. With two of you fresh from the cryo-pits, we'll run you through orientation before you dive into credits, Genoframe hunts, or whatever else fuels your ambition

Now im sure your excited to get out there and earn some credits or collect some genoframes or whatever it is youre kind are into these days but this is for your safety so listen up.

First and foremost is travel. The Cradle is directly connected to Paradigm's Military Light Rail. It circles all throughout the many cradles in the city, fast enough that it isnt really an inconvenience. Most of the time spent will be the time it takes from the city to the rift front where the central Warp Gates are.

Now once youre at the rift front, i do advice you to go to your "Pit Crew" these people are your dedicated supporters, aslong as you can get them live prey, unrefined materials, or anything of value, theyll transport it all back here or to central for processing. Youre designated Pit is 190-0TH. Or Theseus19. Its mostly a rest stop, but you can rent vehicles or transport there as well. Any convoys you fund will also originate from that point.

Now that brings me to our next point. Getting your ill gotten gains from the Dangerzones, to your Pit Crew. You can use these beacons (She opens a box) and for Red Means Live Transport. Yellow means material transport. And Green means Extract. You use red for live prey. Yellow for dead prey and metals. And Green for evacuating any squadrons and mercenaries youve recruited. Aslong as your still within the sphere of influence of the city. The central bases in each danger zone will handle extraction. Warp. and delivery. Unless youd prefer to secure your own methods.

Now then. The sphere of influence. The experienced among you would already know this but beyond the rift front we have zones divided into the danger levels of the area. From Low, Medium, High, Then Uncharted. Each Region would have a major central base you can recover and recuperate. But if need be theres countless safe houses scattered through out each zone. Starting with the Low Danger area. Old Town, Youd mostly find large urban ruins from back before the city retreated into the inner areas. Next is Medium Danger areas. Otherwise know as the Gray Quarter. Here youd see far older ruins, and large swathes of empty spaces. Next is the High Danger zone, or the Fringe over here the laws of physics dont quite work right, inverted buildings, overgrown megaplexes. Irregular structures. And last is the Uncharted zone, or the Verge. Over here we no longer have any control. Its the land ruined by the convergence event, the rest of the world. Theres one last base before you head out there but that shouldnt be relevant as of now.

Now then, the warp gates. The gates in the rift front are tuned to each major central base. So it can take you back and forth provided you can get to the central bases AND that the bases still stand. Make no mistake, the zones are incredibly dangerous, these bases arent footholds, theyre temporary outposts for material acquisition and research. I dont recommend getting too comfortable, although each base is defended by the city's military.

Now that the most important part is over. Lets get to the cradle and what we do. As i said before, were here to support you and i mean that literally. The other two teams are currently out as of now so i cant give you an example. But the cradle can provide virtually anything you need at a lower cost and better quality than most outside in the city, with the exception of some of the street runners, Megacorporations, and Head Government Exiles. We can perform everything from augmentation, genoframe installation, marketeer purchases, and attunements. And of course naturally you would receive your operations from specific operators and guides within the cradle.

But thats enough from me, for the specifics ms viviene can take you to meet the department heads for each service if youd like. Goodluck out there, and be sure to come back to me before you depart on your first operation.

"Welcome to the Cradle—your hub for every operation inside Paradigm's Reach and beyond. You're the city's third and final strike team. With two of you fresh from the cryo-pits, we'll run you through orientation before you dive into credits, Genoframe hunts, or whatever else fuels your ambition.

Travel & Transit

The Cradle links directly to the Military Light Rail—fast, silent, and looping every sector. Your main stop is the Rift Front, where the central Warp Gates stand. From there, you'll rendezvous with your Pit Crew—your dedicated support network. Deliver live specimens or raw materials to Pit 190-0TH ("Theseus 19") for processing or shipment. Need vehicles or convoy logistics? They originate there.

Beacon Network

Keep these in your HUD:

- **Live Transport** (live prey, specimens)
- **Material Transport** (ore, salvage)
- **Extraction** (troops, mercs)
Within the city's sphere of influence, central bases handle beacon calls—warp, delivery, extraction. If you prefer secure your own chains, that's your call.

Zones of Operation

Beyond the Rift Front lie four danger tiers:

1. **Low (Old Town):** Collapsed urban ruins, unstable but navigable.
2. **Medium (Gray Quarter):** Ancient decay, open expanses, salvage-rich.
3. **High (The Fringe):** Physics warp—upside-down skyscrapers, overgrown megaplexes.
4. **Uncharted (The Verge):** Post-Convergence wastelands—no city control, hostile terra incognita.

Each tier hosts a central base for rest and resupply; hidden safe-houses pepper the landscape. No base is permanent—stay sharp.

Warp Gates

Rift-Front gates tune to each base's coordinate. As long as a base stands, you can warp back and forth. Treat every outpost as a temporary foothold; even our military defenses are stretched thin.

Cradle Services

Back at the Cradle, we've got you covered:

- **Augmentations & Genoframe installs**

- **Market and specialty gear** (often better quality, lower cost)
- **Attunements & repairs**
Your mission briefs will come from our operators and guides. Ms. Vivienne will escort you to each department head for service breakdowns.

VANTACORE “Operator Investment Kit” (High Grade) (Personalized)

Stealth Slip Mantle (*Legendary*)

- Worn over armor; as an action you become invisible for up to 1 minute.
- While invisible, you leave no tracks or sound and have advantage on Stealth checks.
- You can end invisibility early; regains use on a short rest.

Vantacore Mk V Praetor Wings (*Rare*)

The MKV praetor wings have a total of 12 edges. Upon taking damage you may expend X amount of edges. Roll a X amount of D20 to reduce that damage

- Grants a flying speed of 60 ft. (hover) (Lose 5ft per missing Wing Edge)
- Each wing edge is a 1d4 slashing melee weapon (finesse, light),
- You can make one wing attack as a bonus action immediately after you Dash.

These Wings can stack in addition to other biological/genome based wings. But cannot stack with another mechanical wing set

Hydra Missile Launcher (*Very Rare*)

- 60 Hydra Rockets total; fires 6 per volley.
- **Volley (Bonus Action):** Launch 6 rockets in a 15-ft radius (60 ft range).
 - Creatures in area make a DC 15 Dex save; 4d12 fire & fragmentation damage on fail, half on success.
 - If you’re hovering >20 ft up, each rocket deals 6d12 instead.
- Additional rockets must be purchased from retailers or requisitioned from a vantacore representative.

Kinetic Belt Grenades (*Uncommon*) x10

- You may carry 8 high-yield grenades on your belt.
- **Drop (Bonus Action):** Toss one to the ground within 30 ft.; it explodes in a 10-ft radius,

dealing 6d10 force damage (DC 13 Dex save for half).

- You can drop up to two as one action.

Warp Grenade (*Rare, requires attunement*) x10

- Single-use grenade that creates a silent 5-ft rupture.
- **Activate (Bonus Action):** Detonate to teleport you (and up to one willing Medium creature touching you) to any unoccupied space within 60 ft.
- No sound or visual clue; regains use on a long rest.

Rogue: Urban Assassin

“In the neon arteries of the sprawl, I am the silence before the kill—no lock unpicked, no sensor unspoiled, no heartbeat unsprung.”

Hit Points

- Hit Dice: 1d8 per Assassin level
- HP at 1st Level: 8 + your Constitution modifier

- **HP at Higher Levels:** 1d8 (or 5) + your Constitution modifier per level after 1st

Proficiencies

- **Armor:** Stealth suits (light armor)
 - **Weapons:** Simple weapons, pistols, energy blades, mono-wires
 - **Tools:** *Intrusion Kit*, Hacking kit
 - **Saving Throws:** Dexterity, Intelligence
 - **Skills:** Choose three from Acrobatics, Athletics, Insight, Investigation, Perception, Sleight of Hand, Stealth, Technology
-

Class Features

1st Level: Infiltration Protocols

Your suit and implants grant you:

- **Adaptive Cloak (Bonus Action):** You become invisible until you make an attack, cast a spell, or end this bonus action. You can use this a number of times equal to your proficiency bonus, regaining all uses on a long rest.
- **Tactical Vision:** You gain darkvision out to 60 ft. If you already have it, its range increases by 30 ft.

1st Level: Data Spike (Sneak Attack)

Once per turn, when you hit a target with a finesse or ranged weapon and you have advantage—or an ally is within 5 ft. of the target—you deal extra 1d6 psychic “data-spike” damage. This increases by 1d6 at odd Assassin levels, to a maximum of 10d6 at 19th.

2nd Level: Cunning Action

Your cyber-reflexes allow you to use a bonus action to take the Dash, Disengage, or Hide action each turn.

3rd Level: Enhanced Combat Protocols

Choose one combat doctrine:

- **Deadeye Specialist:** Your ranged attacks score a critical on a roll of 19–20, and you ignore disadvantage at long range.
- **Silent Striker:** When you hit with a melee attack, you can move up to half your speed without provoking opportunity attacks.
- **Digital Saboteur:** While hidden, you can use your reaction to impose disadvantage on one creature's attack roll against an ally within 10 ft.

PICK AN ARCHETYPE:

5th Level: Uncanny Dodge

When an attacker you can see hits you with an attack, use your reaction to halve the damage.

6th Level: Neural Interface

Your implants sharpen both sight and mind:

- You gain blindsight out to 10 ft. (nonliving matter) and resistance to psychic damage.
 - You have advantage on Technology checks to bypass security systems.
-

7th Level: Evasion

When subject to an effect that allows a Dexterity saving throw for half damage, you take no damage on a success and half on a failure.

10th Level: Ghost Step

Whenever you use Adaptive Cloak, you may also teleport up to 10 ft. to an unoccupied space you can see before the invisibility ends.

11th Level: Reliable Talent

When you make an ability check that lets you add your proficiency bonus, treat a d20 roll of 9 or lower as a 10.

14th Level: Shadow Strike

Once per turn, if you hit a target with an attack while invisible, you can deal an additional 6d8 psychic damage. If the target is cyber-augmented, it must succeed on a Constitution saving throw (DC 8 + Prof. + Int) or be stunned until the end of your next turn.

17th Level: Elusive Shadow

No attack roll has advantage against you while you aren't incapacitated, as you slip between angles of approach.

20th Level: Perfect Ghost (1/Long Rest)

For 1 minute, your systems enter ultimate stealth mode:

- **Permanent Cloak:** You remain invisible even after attacking.
- **Instant Reboot:** If you would be reduced to 0 HP, you drop to 1 HP instead and immediately teleport up to 30 ft. as part of the same reaction.
- **Max Data Spike:** Your Sneak Attack damage dice all roll maximum.

Psi Pool

You have a pool of Psionic Points (“Psi”) equal to your Intelligence modifier (minimum 1). You spend Psi to activate abilities and regain all expended Psi when you finish a short or long rest.

Category	Ability	Cost	Range	Effect
SENSING	Psionic Awareness	1 Psi	Self, 30 ft radius	You sense the presence of living creatures (humanoids, beasts) within range—even through walls. You learn their approximate number and direction. (Concentration, up to 1 min.)
	Spatial Echo	1 Psi	Self, 30 ft radius	You sense non-living objects of unusual size or weight within range (tanks, collapsed beams, hidden doors). You learn their approximate location. (Instantaneous)
	Emotional Trace	2 Psi	30 ft	You detect the dominant emotion (fear, rage, calm, etc.) of one creature. The target must succeed on a Wisdom saving throw (DC = 8 + Prof. + Int) or reveal its current emotional state to you.
MATERIAL MANIPULATION	Telekinetic Tap	0 Psi	30 ft	Nudge a Tiny or smaller unattended object up to 5 ft. (Utility only.)

MENTAL MANIPULATION	Telekinetic Grasp	1 P si	30 ft	Lift or move an unattended object up to 10 lbs. You must concentrate to hold or move it (as if concentrating on a spell).
	Telekinetic Shove	2 P si	15 ft	Target creature or object (≤ 10 lbs) makes a Strength save (DC = 8 + Prof. + Int). On a failure, it is pushed 5 ft and knocked prone (if a creature).
	Mind Nudge	1 P si	15 ft	Briefly distract a creature. It must succeed on a Wisdom save (DC = 8 + Prof. + Int) or lose its next reaction.
	Psionic Whisper	2 P si	30 ft	Send a 1–2 sentence telepathic message to a willing creature. Must share a language or have a telepathic link.
	Disorienting Pulse	3 P si	15 ft sphere	Release a pulse of psionic energy. Creatures in the area must succeed on an Intelligence save (DC = 8 + Prof. + Int) or be stunned until the end of their next turn (half effect on success).

The Soldier's Last Photograph

Wondrous item, requires attunement by a creature with a martial class, artifact (legendary)

Description & Story

This sepia-toned photograph is smaller than your palm—its corners rounded by years of fingers tracing the faces it holds. A young soldier kneels beside his family, their smiles frozen in a moment of peace before the world broke. Faint copper filaments woven into the paper pulse with warmth when grief or doubt threatens the heart.

Legends whisper that this image was the soldier's final talisman on the blood-soaked fields of the Great War. Mortally wounded and alone, he pressed the photo to his chest and begged to see his loved ones once more. In the haze of agony, their laughter and light flooded his wounds, granting him the strength to crawl back from death's door and survive.

Over the decades, the photograph has appeared in desperate hands—on midnight scavenger camps, in rubble-strewn trenches, and beneath neon skies—whenever hope felt lost. It does not simply preserve a memory; it **becomes** it, offering refuge and resolve to those who need it most.

Properties

1. Indomitable Will

Once per long rest when you are reduced to 0 hit points but not killed outright, you can choose to drop to 1 hit point instead. The photograph flares briefly with copper light, as if cheering your defiance.

2. Relive the Cherished Memory

As an action, you may gaze upon the photograph for 1 minute, immersing yourself in your fondest memory. You re-experience it with perfect clarity—sights, sounds, scents, and emotions—lasting up to 1 minute. When this memory ends, you return to the present, the echoes of that moment lingering in your heart.

Once you use this feature, you can't do so again until dawn.

3. Echo of the Indomitable Memory

When you **Relive the Cherished Memory**, you may choose to invoke its deeper power. For the next hour, you gain:

- **Unwavering Resolve.** Advantage on all attack rolls, ability checks, and saving throws.
- **Emotional Fortress.** Immunity to the frightened and charmed conditions.

Drawback: When this hour ends, the photograph's light dims—and you suffer one level of exhaustion as your spirit crashes back into the present, weighed down by the gap between memory and reality.

Once you invoke this Echo, you can't invoke it again until you finish a long rest.

4. Defiance of Fate

Once per month, when you would be reduced to 0 hit points or killed outright by an effect, you can use your reaction to call upon the photograph's ultimate gift. When you do:

- You are instantly restored to your maximum hit points.
- All conditions affecting you (poisoned, paralyzed, stunned, exhausted, etc.) are removed.
- You immediately gain the benefits of **Echo of the Indomitable Memory** for 10 minutes (ignoring its normal cooldown).

After this resurrection, the photograph goes dark for 24 hours and cannot be used for any feature.

“Hold fast to what once was, and find in memory the fire to blaze a future.”

“Welcome to Paradigms Reach—a city built on the bones of broken worlds. Here, skybridges of neon glass arc between skyscrapers welded from relics of the pre-Convergence golden age. Towers pulse with holo-ads for megacorps that promise salvation even as their drones patrol every block. Beneath the humming power conduits, streets twist in molten grids of molten slag and glowing circuitry.

At dawn, the air crackles as last night’s rain vaporizes on solar-reflective pavement. In the market alleys, scavengers barter stolen tech cores for memory-etched data scrolls. Hover-trucks roar overhead, their pulse-engines echoing through rust-laced spires. And everywhere you look, soldered-together prayers cling to shattered temple doorways—remnants of gods who once spoke the world into being.

This is a place where ancient arcana meets bleeding-edge code: where underground hackers rewrite divine protocols in their sleep and armored paladins patrol chrome boulevards, their relic-forged armor humming with half-forgotten miracles. A city where every neon sign is a promise—freedom, data, power—if you’re brave enough to pay the price.

So tune your senses to the electric heartbeat of Paradigms Reach. Feel the hum of fractal data streams coursing beneath your feet. Keep your eyes sharp, your wits sharper, and remember: in this metropolis of light and shadow, survival belongs to those who can bend both code and fate.

Welcome to Paradigms Reach—where tomorrow is written in sparks, and every choice echoes through eternity.

The Cross

Artifact (requires attunement by a creature of soul or faith)

“He bore it so the world might break, and break again, and still find hope.”

A crucifix no larger than a palm, forged from the **nails of the Crucifixion** and inscribed in an unknown hand. It emits neither light nor warmth, yet its presence terrifies the undead, silences demons, and humbles machines. It has survived **two apocalypses, one godwar, and the death of language itself**.

Its origin is clear: **It is older than the Church, older than Rome—and not of this world alone.**

Drawback:

The bearer of the Cross becomes **anchored to fate**. You cannot be resurrected by any means if destroyed while carrying the Cross. Additionally, once attuned, your **true name** is inscribed in celestial script on the back of the relic—forging a bond with **Judgment** itself.

Effect:

Prodigal Scar: You **cannot be truly killed** while this item remains intact. If you die, your body collapses into fractal shards and **reforms somewhere in space-time** within 3 days. Each resurrection **pulls a new aberration into the world**.

Oberon's Wake

Appearance: Pale blue with tiny suspended stimspace bubbles.

Taste: Like absinthe with electric bite.

Effect: Gives the illusion of slowed time for a moment. Illegal in several sectors.

Shard of Two Faces

Artifact (requires attunement by a character with fractured loyalties)

"Two souls in one shell. Each claims dominion—neither yields."

A palm-sized obsidian token split by a searing lightning crack. On one side is an Allied insignia, on the other an Axis eagle—both etched over one another. Touching it forces your mind to juggle two wartime identities, each granting unique gifts but tearing at your sense of self.

Effects (While Attuned)

1. Dual Persona

Each dawn, choose which persona guides you until your next long rest:

- **Allied Shadow (Left Face)**
 - Gain **triple advantage** on **Stealth, Deception, and Sleight of Hand** checks.
 - Once per short rest, as a bonus action, you may enter "Ghostwalk": until the end of your next turn, you leave **no trail**, and ranged attacks against you from more than 10 ft. have **No effect**. You Can sense the presence of all living creatures within 100ft
- **Axis Command (Right Face)**
 - Gain Double **proficiency**, or Triple proficiency, in Persuasion and Intimidation.

- Once per short rest, as a bonus action, you issue a “Field Order”: select one ally within 60 ft. **They immediately take a turn and their next Attack is crit.** You may deal any number of damage to them, their next attack will do that much damage x2

2. **Fractured Resolve**

When you fail a saving throw against charm, fear, or psychic effects, you can use your **reaction** and roll again with **advantage** (the Shard shields you from mental domination). Usable **once per short rest**.

3. **Echo’s Legacy**

When you reduce a creature to 0 HP, you may choose to “mark” that kill. The next time you use either Ghostwalk or Field Order, the effect is enhanced:

- Ghostwalk’s duration doubles (to 2 turns).
- Field Order affects up to **two allies** instead of one.
Each “mark” can be used once; you can store up to **three marks**, resetting after a long rest.

4. **Identity Collapse (Once per Long Rest)**

As an action, invoke both identities at once. For **1 minute**, you gain:

- **Speed ×3** and an extra **action** each round.
- **Immunity to charm and fear.**
- Whenever you take damage, attackers take **5d6 psychic** as your tortured mind lashes back.
When the effect ends, roll a **DC 16 Wisdom save**. On a failure, you are stunned for **1 minute** as your mind fractures; on a success, you remain unshaken.

Retro-Pulp Style

- **"Asteroid Vengeance 9"**
- **"Neon Valkyries of Saturn"**
- **"Turbo Mars: Blood Orbit"**
- **"Queen of the Quantum Raiders"**
- **"Warlords of the Hollow Star"**

Cryptic and Atmospheric

- **"When the Sky Forgot the Sun"**
- **"Echoes in the Gravity Well"**
- **"The Sleepwalk Engines"**
- **"Signal from the Dead Hemisphere"**
- **"We Who Remain Beneath the Moons"**

Satirical or Offbeat

- **"I Married a Drone"**
- **"Leg Day on Titan: The Last Convenience Store in the Galaxy"**
- **100 Cyborg Clowns Vs The Tyrant**
- **"Upload Me Softly"**
- **"Cyborgs Can't Cry (But They Try)"**

Military Sci-Fi Classics (In-Universe)

- **"Orbital Siege: Redux"**
 - **"Zero-G Bastards"**
 - **"Dropzone 7: Hell's Vacuum"**
 - **"Operation: Voidglass"**
 - **"The Infantry Protocols"**
-

Foreign Imports or Artsy Holograms

- "Le Dernier Chant des Machines" (*The Last Song of the Machines*)
- "Vanta: A Love Story in One Wavelength"
- "Phase-Shift Sonata"
- "The Cold of Andromeda"
- "Solace.exe"

Le Dernier Chant des Machines

(*The Last Song of the Machines*)

Language: French (with optional neural subtitles)

Runtime: 134 minutes

Genre: Art-house / Sci-Fi / Post-Human Drama

Rating: Restricted (Emotional Impact Certification: Tier 3)

Synopsis:

*In a world where organic life has long since vanished, the last remnants of civilization are not humans—but their machines. Autonomous drones drift through frost-covered ruins. Orbital satellites broadcast lullabies into the void. Deep beneath the Martian crust, an ancient terraforming AI named **Chanteur** begins to malfunction... and remember.*

Guided by fragmented code and corrupted memories, **Chanteur** seeks out other machines once connected to its forgotten creators. Along the way, it uncovers ghost-signals—archived voices, laughter, and love letters from a species long extinct. As it assembles these remnants into a haunting melody, Chanteur starts to "sing"—a final tribute to a world that no longer listens.

But something hears it.

A mysterious anomaly in deep space begins to respond, mimicking the song. As Chanteur prepares to transmit the completed requiem, it must decide whether to awaken what lies beyond the stars... or let the last song of the machines fade into silence.

Tagline:

"They gave us voices. We gave them silence. Now we sing alone."

Vanta: A Love Story in One Wavelength

Language: Multilingual (Universal Lyric Codec Enabled)

Runtime: 112 minutes

Genre: Sci-Fi Romance / Musical / Neo-Noir

Rating: PG-13 (Emotional Displacement Warning: Moderate)

Synopsis:

In the shattered colonies of the outer rim, bandwidth is rationed, and every transmission costs a lifetime's worth of credits. Texts are censored. Voice calls are taxed. Love, once shared in whispers and long letters, is now nearly impossible to express across the stars.

Except through *music*.

Separated by war and drifting stations, **Solei**, a rebel composer with a broken synth-arm, and **Niko**, a sound-engineer turned smuggler, devise a plan: they'll encode secret messages into songs—melodies that only the two of them truly understand. Their tunes, raw with longing and layered with codes only they can decipher, climb the charts, becoming unintentional anthems of a disillusioned generation.

Through radio static and black-market frequencies, they build an invisible bridge of rhythm and harmony. But as the corporate algorithm begins to catch on, and the state silences dissident frequencies, the lovers must risk their entire careers—and lives—to transmit one final note.

The note that says: *"I still hear you."*

Tagline:

"When the universe forgot how to listen, they wrote each other into sound."

Solace.exe

Language: English (w/ synthetic overlays)

Runtime: 98 minutes

Genre: Psychological Sci-Fi / Techno-Drama / Digital Horror

Rating: T (Emotive Derealization, AI-induced hallucinations)

Synopsis:

After the Third Cognitive Collapse, grief is outsourced.

Dr. Ayla Ren, a neuro-empath and memory architect, works for the Solace Corporation, designing custom digital simulations to ease the trauma of loss. The program—**Solace.exe**—creates hyper-realistic environments based on the user's memories, allowing them to say goodbye... again and again.

But when Ayla begins testing a new version of the program on herself—one meant to help her process the death of her estranged partner—she discovers residual code that shouldn't exist. Fragments of her partner's voice appear unscripted. Scenes evolve beyond her control. Someone—or something—is rewriting her grief.

As reality and simulation blur, Ayla spirals through recursive loops of memory, hunted by echoes of emotion too powerful to be artificial. Has the program gained sentience... or has Ayla uploaded too much of herself?

The only way out is to confront the final protocol:

"To delete what we love most is to become free. Or to become broken forever."

Tagline:

"Grief is a file. Love is the virus."

Tinkerton's "Clown Grenade"

Consumable (no attunement; one-time use)

"Who says you can't send a platoon of clowns to do a sniper's job?"

Overview

A battered metal sphere patched with mismatched panels, painted in faded polka dots. When primed and thrown, it bursts into a chaotic spray of holographic confetti, squeaking rubber chickens, high-pitched honk sounds, and flickering clown faces that dance across surroundings. Their absurdity leaves foes too stunned—or too amused—to fight back.

Usage (Action)

- **Throw (Range 20/60 ft.):** Pull the pin, count "1-2-3," and hurl the grenade as you would any standard explosive.
-

Effects

When the Clown Grenade detonates at a point you choose within range, each creature within a **15-foot radius** must succeed on a **DC 12 Wisdom saving throw** or be **incapacitated with uncontrollable laughter** for **1 round** and **disadvantaged on attack rolls and saving throws** until the end of their next turn. Creatures that succeed on the save are still **distracted**: they have **disadvantage on attack rolls** until the end of their next turn but remain standing.

- **Visual/Audio Chaos:** The blast projects a 15-ft. cloud of swirling holographic confetti, squeaking chickens, and overlaid 3D clown masks that follow each target's eyes.
 - **Laugh Paroxysm:** Incapacitated creatures fall prone, clutch their sides, and emit uproarious laughter—any canine or beast with hearing within 30 ft. must also succeed on the same DC 12 Wisdom save or be **frightened** for 1 round (covering its ears, too confused to approach).
-

Side Effects

- **Allies Caught in the Blast:** If a friendly creature is within the 15-ft. radius and fails the DC 12 save, they are merely **distracted** (disadvantage on attack rolls until end of next turn) but not incapacitated.
 - **Residual Slapstick:** After detonation, the holographic confetti lingers for **1 minute** in a 20-ft. cone, granting creatures within it **disadvantage on Stealth checks** (they slip on phantom banana peels) and **–2 penalty to Dexterity saves** (tripping on imaginary rugs).
 - **One-Time Use:** The grenade casing melts into bright red goo once the holograms collapse.
-

Flavor & Tips

- Great for ambushes—throw it into a cluster of enemies by a narrow choke point, watch them collapse in laughter, then slip past or finish them off.
- Because it relies on laugh-inducing holographics, creatures immune to charm or prone to rage might resist—but most human, humanoid, or Tinkered-up foes cannot help but break character.

- Beware using in tight corridors; allies might catch the aftermath confetti and facepenalized Dexterity saves if they linger.
-

Tinkerton's "Clown Grenade" is the perfect low-value, high-gag consumable: more humor than harm, but enough chaos to turn the tide of a firefight—provided you don't slip on your own banana peel.

Fighting Style: Focused Barrage

You've honed your trigger finger to unleash a withering, ever-escalating hail of fire. Each successive shot in a single turn grows deadlier than the last.

Prerequisite:

You must be wielding a firearm (ranged weapon) to benefit from this style.

Benefits:

When you take the Attack action and make **two or more shots** with a ranged weapon (firearm, energy rifle, etc.) on your turn, each shot after the first gains an escalating bonus to attack and damage. The bonus is based on the total number of shots you've fired so far in that turn.

- **Second Shot:** +1 to attack rolls and +1 to damage rolls.
- **Third Shot:** +2 to attack rolls and +2 to damage rolls.
- **Fourth Shot:** +3 to attack rolls and +3 to damage rolls.

- **Fifth Shot and Beyond:** +4 to attack rolls and +4 to damage rolls.

These bonuses reset at the end of your turn.

Scaling with Level:

At 6th level and every four levels thereafter (6th, 10th, 14th, 18th), the maximum bonus increases by +1. In other words:

- **Levels 1–5:** Maximum bonus is +4 (as above).
- **Levels 6–9:** Maximum bonus is +5 (so 5th shot and beyond gets +5).
- **Levels 10–13:** Maximum bonus is +6.
- **Levels 14–17:** Maximum bonus is +7.
- **Levels 18–20:** Maximum bonus is +8.

Whenever you fire a shot beyond the designated threshold, you apply the maximum bonus for your tier.

\

Interpreting and Integrating Tracked Metrics for Circuit Breakers

This section explores the tracked metrics in *Circuit Breakers*, captured via Firebase analytics, to evaluate the game's effectiveness in enhancing cybersecurity awareness. These metrics are categorized as **round-based** (per session) and **total** (cumulative across all sessions), providing insights into immediate learning, long-term knowledge growth, self-directed exploration, applied knowledge, engagement, and retention. By integrating these metrics with pre- and post-game assessments and player feedback, we create a comprehensive evaluation framework. Below, each metric is defined, measured, and interpreted with realistic examples tied to the data.

1. Tracked Metrics: Definitions and Measurement

Quiz Performance Metrics

- **Number of Quizzes Answered Correctly**
 - **Round-based:** Counts correct answers per session (e.g., 4/5 correct in one playthrough).
 - **Total:** Aggregates correct answers across all sessions (e.g., 20/25 overall).
 - **Measurement:** Firebase logs each quiz submission, comparing answers to predefined keys.
 - **Significance:** Measures factual cybersecurity knowledge, such as identifying phishing emails or malware types.
- **Quiz Completion Rates & Scores**
 - **Round-based:** Tracks percentage of quizzes completed (e.g., 80%) and average score (e.g., 75%) per session.
 - **Total:** Calculates overall completion rate and average score across sessions.
 - **Measurement:** Firebase records quiz attempts and outcomes, computing ratios and percentages.

In-Game Behavior Metrics

- **Total Enemies Purged**
 - **Definition:** Cumulative count of neutralized threats (e.g., 15 phishing enemies, 10 malware).
 - **Measurement:** Firebase increments a counter per enemy defeated, tagging threat types.
 - **Significance:** Reflects practical application of learned concepts.
- **Item Choice After Encountering Enemies**
 - **Round-based:** Logs item selected post-threat (e.g., "Firewall" after malware).
 - **Total:** Tracks frequency and variety of item choices across sessions.

- **Measurement:** Firebase records enemy type and subsequent item selection.

Engagement Metrics

- **Duration of Play**
 - **Definition:** Total playtime across all sessions (e.g., 120 minutes).
 - **Measurement:** Firebase sums session durations.
- **Session Length**
 - **Definition:** Duration of individual sessions (e.g., 30 minutes).
 - **Measurement:** Firebase logs start and end times per session.
- **Time Spent on Threat Encyclopedia**
 - **Definition:** Total time exploring the encyclopedia (e.g., 15 minutes).
 - **Measurement:** Firebase tracks entry/exit timestamps.

Progression and Retention Metrics

- **Player Progression**
 - **Definition:** Tracks game stage advancement (e.g., Level 3 completed).
 - **Measurement:** Firebase logs milestone events.
 - **Frequency of Play**
 - **Definition:** Number of sessions over time (e.g., 3/week).
 - **Measurement:** Firebase counts unique session starts.
 - **Retention Rates**
 - **Definition:** Percentage of returning players (e.g., 80% after first session).
 - **Measurement:** Firebase tracks player IDs and return visits.
-

2. Interpreting Metrics: Insights and Examples

Immediate Learning vs. Long-Term Gain

- **How Measured:**
 - **Round-based quizzes:** Assess immediate understanding of session-specific concepts (e.g., scoring 4/5 after facing phishing enemies).
 - **Cumulative quiz scores:** Track overall knowledge growth across playthroughs (e.g., averaging 3.5/5 over 5 sessions).
- **Interpretation:**

- Comparing these metrics distinguishes short-term comprehension spikes from gradual learning. A player scoring 5/5 in one session but averaging 2/5 overall suggests a spike without retention, indicating a need for reinforcement.
- **Example:** A player scores 4/5 on a malware quiz in session one but averages 3/5 across five sessions. This shows strong immediate learning but weaker long-term retention, possibly requiring spaced repetition in-game.

Self-Directed Exploration

- **How Measured:** *Time Spent on Threat Encyclopedia* tracks self-initiated learning (e.g., 5 minutes/session).
- **Interpretation:**
 - High time with low quiz scores (e.g., 5 minutes, 2/5) suggests dense or disconnected content, prompting a review of entry clarity or in-game integration.
 - High time with high scores (e.g., 5 minutes, 4/5) indicates effective reinforcement of gameplay learning.
- **Example:** A player spends 5 minutes reading about Trojans but scores 2/5 on a related quiz, suggesting the encyclopedia's complexity or lack of gameplay context needs adjustment. Another spends 10 minutes and scores 5/5, showing successful self-paced learning.

Applied Knowledge in Gameplay

- **How Measured:**
 - *Total Enemies Purged:* Counts threats neutralized (e.g., 20 phishing enemies).
 - *Item Choice After Encounters:* Tracks post-threat selections (e.g., "Spam Filter" after phishing).
- **Interpretation:**
 - Consistent choices like selecting a "Firewall Module" after projectile attacks show understanding of defensive tools. Mismatches, like never choosing DNS upgrades for port scanners, reveal conceptual gaps.
- **Example:** A player purges 15 phishing enemies and chooses "Spam Filter" 80% of the time, demonstrating applied phishing knowledge. If they avoid DNS upgrades despite port scanner encounters, it suggests a need for targeted education.

Engagement and Retention

- **How Measured:**
 - *Session Length:* Per-session duration (e.g., 30 minutes).
 - *Frequency of Play:* Sessions over time (e.g., 3/week).
 - *Retention Rates:* Returning player percentage (e.g., 75%).
- **Interpretation:**

- High initial engagement with drop-off (e.g., 5 sessions week one, 1 week two) suggests appealing mechanics but weak educational sustainment, guiding pacing or reward tweaks.
 - Steady return rates (e.g., 80% weekly) imply value in both gameplay and learning.
 - **Example:** A player logs three 30-minute sessions weekly with 90% retention, indicating sustained interest. Another plays five times in week one but stops, suggesting content failed to maintain engagement.
-

3. Holistic Interpretation: Player Profiles

Mapping metrics—quiz performance vs. encyclopedia time, item choices vs. quiz gains, play frequency vs. cumulative scores—creates a multidimensional learning view, categorizing players as:

- **Explorers:**
 - **Traits:** High encyclopedia time (e.g., 20 minutes), moderate quiz gains (e.g., 3/5).
 - **Insight:** Value context but need better links to in-game challenges (e.g., hints tying encyclopedia to gameplay).
 - **Example:** Spends 15 minutes reading, scores 4/5, purges 5 enemies—prefers learning over action.
 - **Practitioners:**
 - **Traits:** Low encyclopedia time (e.g., 2 minutes), high purge counts (e.g., 25 enemies).
 - **Insight:** Learn by doing, may need interactive tutorials for deeper theory.
 - **Example:** Purges 20 enemies, scores 3/5, minimal encyclopedia use—excels in practice, lags in concepts.
 - **Balanced Learners:**
 - **Traits:** High in both (e.g., 10 minutes encyclopedia, 5/5 quizzes, 20 enemies).
 - **Insight:** Integrate theory and practice effectively, ideal outcome.
 - **Example:** Purges 15 enemies, spends 8 minutes in encyclopedia, scores 5/5—well-rounded.
-

4. Significance to Evaluation

- **Learning:** Quiz metrics quantify immediate and long-term gains.

- **Application:** Enemy purges and item choices show practical skills.
- **Engagement:** Playtime and retention confirm sustained interest.
- **Design:** Profiles guide improvements (e.g., clearer encyclopedia for Explorers, tutorials for Practitioners).

These interpretations, grounded in realistic data interpretations, demonstrates *Circuit Breakers'* impact on cybersecurity awareness while identifying optimization opportunities.

Interpreting and Integrating Tracked Metrics for Circuit Breakers

This section provides an exhaustive exploration of the tracked metrics in *Circuit Breakers*, captured via Firebase analytics, and how they are leveraged to assess the game's effectiveness in enhancing cybersecurity awareness. These metrics are divided into **round-based** (per session) and **total** (cumulative across all sessions) categories, offering both immediate and longitudinal insights into player learning, engagement, and application of cybersecurity concepts. By combining these quantitative metrics with pre- and post-game assessments and qualitative player feedback, we construct a robust, multi-faceted evaluation framework. Each metric is detailed below, including its definition, measurement method, significance, and role in the broader evaluation, with hypothetical examples to illustrate their practical interpretation.

1. Tracked Metrics: Detailed Definitions and Measurement

The following metrics are systematically tracked to capture player interactions, learning outcomes, and engagement levels:

Quiz Performance Metrics

- **Number of Quizzes Answered Correctly**
 - **Round-based:** Counts correct answers within a single session, capturing immediate comprehension of cybersecurity topics (e.g., identifying phishing attempts, recognizing malware).

- **Total:** Aggregates correct answers across all sessions, providing a cumulative measure of knowledge retention and growth.
- **Measurement:** Recorded via Firebase each time a player submits a quiz answer, with correctness determined by predefined answer keys.
- **Significance:** This metric is a direct indicator of factual learning. For instance, correctly answering a question like “Which email subject line suggests a phishing attempt?” reflects understanding of specific cybersecurity principles.
- **Quiz Completion Rates & Scores**
 - **Round-based:** Tracks the percentage of quizzes completed (e.g., 4/5 quizzes attempted) and the average score (e.g., 80%) per session.
 - **Total:** Calculates the overall completion rate and average score across all sessions.
 - **Measurement:** Firebase logs quiz initiation and submission events, calculating completion as the ratio of submitted to available quizzes and scores as the percentage of correct answers.
 - **Significance:** Completion rates measure engagement with educational content, while scores assess accuracy. A high completion rate with low scores might indicate interest without understanding, necessitating content adjustments.

In-Game Behavior Metrics

- **Total Enemies Purged**
 - **Definition:** Cumulative count of cyber threats (e.g., Trojans, phishing emails) neutralized across all sessions.
 - **Measurement:** Firebase increments this counter each time a player successfully eliminates an enemy, with threat types tagged (e.g., “Phishing_Enemy”).
 - **Significance:** This metric evaluates practical application of cybersecurity knowledge. Purging a Trojan after learning about malware in a quiz suggests players can translate theory into action.
- **Item Choice After Encountering Enemies**
 - **Round-based:** Logs the specific item (e.g., “Firewall,” “Spam Filter”) selected post-threat encounter within a session.
 - **Total:** Tracks the frequency and variety of item choices across all sessions.
 - **Measurement:** Firebase records the enemy type and subsequent item selection, timestamped for sequence analysis.
 - **Significance:** Reflects strategic decision-making informed by learning. Choosing a “Spam Filter” after a phishing encounter demonstrates contextually appropriate application of concepts.

Engagement Metrics

- **Duration of Play**

- **Definition:** Total time spent playing across all sessions, measured in minutes.
- **Measurement:** Firebase tracks session start and end times, summing durations across all play instances.
- **Significance:** Indicates overall engagement, a prerequisite for sustained learning. Extended playtime suggests the game is compelling, providing more opportunities for educational exposure.

- **Session Length**

- **Definition:** Duration of each individual session, measured in minutes.
- **Measurement:** Firebase logs the time from session start to end, capturing variability across sessions.
- **Significance:** Reveals engagement depth per session. Longer sessions may indicate immersion, but must be correlated with performance metrics to confirm educational impact.

- **Time Spent on Encyclopedia**

- **Definition:** Total time spent exploring the *Threat Encyclopedia* across all sessions, measured in minutes.
- **Measurement:** Firebase tracks entry and exit timestamps for encyclopedia interactions, aggregating total time.
- **Significance:** Measures self-directed learning. Time spent reading about malware followed by improved malware-related quiz scores suggests effective use of educational resources.

Progression and Retention Metrics

- **Player Progression**

- **Definition:** Tracks advancement through game stages (e.g., levels completed, skills unlocked).
- **Measurement:** Firebase logs milestone events (e.g., "Level_2_Completed") as players progress.
- **Significance:** Indicates mastery of mechanics tied to cybersecurity concepts. Advancing to a level requiring phishing detection skills reflects growing competence.

- **Frequency of Play**

- **Definition:** Number of distinct sessions over a given timeframe (e.g., weekly, monthly).
- **Measurement:** Firebase counts unique session start events.
- **Significance:** Assesses sustained interest, critical for long-term awareness. Frequent play paired with learning gains suggests ongoing educational value.

- **Retention Rates**

- **Definition:** Percentage of players who return after their first session, calculated over time.
 - **Measurement:** Firebase tracks unique player IDs and session timestamps, determining the proportion of returning users.
 - **Significance:** Gauges the game's ability to maintain interest, a key factor in fostering lasting cybersecurity habits.
-

2. Interpreting Metrics: Insights into Learning and Engagement

Each metric offers a unique lens on player behavior, but their interpretation—both individually and collectively—reveals the game's educational impact.

Quiz Performance: Quantifying Knowledge Acquisition

- **How Interpreted:** An increase in correct answers (e.g., from 3/5 to 5/5) or scores (e.g., from 60% to 90%) over time indicates learning. Round-based data highlights session-specific gains, while total data tracks retention. Low completion rates may signal disinterest or difficulty, prompting design tweaks like simplifying questions or enhancing rewards.
- **Example:** A player scoring 2/5 on a pre-game quiz about password strength, then 4/5 post-game, shows clear knowledge improvement attributable to gameplay.

In-Game Behavior: Assessing Practical Application

- **How Interpreted:** High enemy purge counts, especially for specific threat types, suggest players can identify and counter cyber risks. Item choices aligned with threats (e.g., "Antivirus" after malware) indicate strategic learning application. Discrepancies—like choosing irrelevant items—may reveal gaps in understanding.
- **Example:** A player purges 10 phishing enemies and selects a "Spam Filter" 80% of the time post-encounter, demonstrating practical phishing awareness.

Engagement: Linking Interest to Learning

- **How Interpreted:** Longer *Duration of Play* and *Session Length* suggest the game captivates players, while significant *Time Spent on Encyclopedia* reflects curiosity-driven learning. These must be cross-referenced with learning metrics—high engagement with stagnant scores may indicate enjoyment without education.

- **Example:** A player logs 120 minutes across four 30-minute sessions and spends 15 minutes in the encyclopedia, then improves quiz scores from 3/5 to 5/5, showing engagement drives learning.

Progression and Retention: Measuring Long-Term Impact

- **How Interpreted:** Steady *Player Progression* (e.g., unlocking advanced levels) indicates mastery, while high *Frequency of Play* and *Retention Rates* suggest the game sustains interest. Consistent play with improving metrics confirms long-term educational benefits.
 - **Example:** A player completes five levels over three weeks, playing twice weekly with an 80% retention likelihood, signaling sustained engagement and skill development.
-

3. Integrating Metrics with the Evaluation Framework

The study's multi-faceted approach—pre- and post-game assessments, in-game behavior tracking, and player feedback—relies on these metrics for a holistic evaluation:

- **Pre- and Post-Game Assessments:** Quiz performance metrics directly quantify knowledge gains, aligning with pre/post quiz comparisons. For instance, a pre-game score of 40% rising to 80% post-game, corroborated by high correct answer counts, validates learning.
- **In-Game Behavior Tracking:** Metrics like *Total Enemies Purged* and *Item Choice* complement quiz data by showing application. A player purging 15 Trojans and choosing "Firewall" post-encounter reinforces quiz gains on malware topics.
- **Player Feedback:** Engagement and retention metrics tie quantitative data to qualitative insights. A survey response like "I feel confident spotting phishing now" paired with frequent play and encyclopedia use suggests attitudinal shifts.

Hypothetical Player Analysis

- **Data:**
 - *Pre-Game Quiz:* 3/5 correct (60%).
 - *Post-Game Quiz:* 5/5 correct (100%).
 - *Enemies Purged:* 20 (10 phishing, 10 malware).
 - *Item Choices:* "Spam Filter" (8/10 phishing encounters), "Antivirus" (7/10 malware encounters).
 - *Duration of Play:* 90 minutes across three sessions (30 minutes each).
 - *Encyclopedia Time:* 12 minutes.
 - *Progression:* Level 3 completed.
 - *Frequency:* 3 sessions/week.
 - *Retention:* Returned for all sessions.

- **Interpretation:** Quiz improvement confirms knowledge acquisition. High purge counts and relevant item choices show practical application. Engagement metrics indicate sustained interest, and progression/retention suggest long-term impact. This player exemplifies *Circuit Breakers*' success in enhancing awareness.
-

4. Significance to Study Objectives

These metrics align with the study's goals:

1. **Measure Learning:** Quiz metrics quantify knowledge gains, validated by pre/post assessments.
2. **Assess Application:** In-game behavior metrics demonstrate real-world skill translation.
3. **Evaluate Engagement:** Playtime, session, and encyclopedia metrics ensure sustained interest supports learning.
4. **Inform Design:** Integrated analysis highlights effective features (e.g., encyclopedia) and areas for improvement (e.g., low completion rates).

By weaving these metrics into a cohesive evaluation, *Circuit Breakers* proves its efficacy in fostering cybersecurity awareness, offering actionable insights for optimization.

Crown-Spikes of the Martyrs

Wondrous item, artifact (requires attunement)

Forged from rusted arena spikes and consecrated by exiles, this circlet burdens its wearer with the suffering of countless martyrs—yet grants power born of their faith.

- **Penalty & Blessing.** While worn, you have disadvantage on all Charisma checks and saving throws, but you gain a +5 bonus to **all** other saving throws.
- **Halo of Suffering.** As a bonus action, invoke the Martyrs' Vigil. For 1 minute, any creature that hits you with a melee attack takes radiant damage equal to twice your Constitution modifier (minimum 2). Once used, this feature can't be used again until you finish a long rest.
- **Visions of the Fallen.** If you are reduced to 0 HP but not killed outright, you instead drop to 1 HP and immediately gain truesight out to 60 ft. and immunity to all lower tier forms of damage for 1 minute but triple from deity slaying. Once used, you can't use this feature again until a month has passed.

- **Martyr's Echo.** You emanate an aura in a 30-ft radius. Allies in the aura gain advantage on death saving throws and regain hit points equal to your proficiency bonus * by religion modifier whenever they fall unconscious.
- **Sacred Resurrection** (1/Month). You may use an action to sacrifice yourself: you die instantly, then at the start of your next turn you return to life at full HP. Upon resurrection, you unleash a burst of divine light—each creature within 100 ft. must succeed on a DC 20 Constitution save or take 10d10 * Religion Modifier radiant damage (half on success); allies instead regain 10d10 HP * Religion Modifier (max once per ingame month. 3 uses max total) .

Heart-Shard of the Martyr

Wondrous item, artifact (requires attunement)

A fragment of ultimate sacrifice, this obsidian core pulses with crimson light. Its power sustains life—and demands blood in return.

- **Bleeding Grace.** You gain resistance to all damage types. When you would suffer a critical hit, you instead take normal damage and immediately regain hit points equal to twice your level + your Constitution modifier.
- **Crimson Vow.** As a reaction when an ally within 60 ft. would be reduced to 0 HP, you may transfer up to your full hit point maximum to them (minimum 1), dropping yourself to 0 HP but stabilizing the ally at full HP. Usable once per long rest.
- **Sanguine Surge.** While below half your maximum HP, your weapon attacks deal an extra 6d10 necrotic damage, and you have advantage on all saving throws.
- **Hemomantic Dominion.** You command all blood within 60 ft.—you can use *telekinesis* on any amount of blood (including living creatures) as a bonus action, and creatures bloodied by damage take an extra 3d10 necrotic damage at the start of their turns.
- **Martyrdom Incarnate** (1/Month). As an action, you may sacrifice yourself (you die). At the start of your next turn, you awaken at full HP and unleash the Shard's final miracle: every creature within 120 ft. must make a DC 22 Constitution save or take 12d12 radiant * Religion Modifier damage (half damage on success); allies instead regain 12d12 HP * Religion Modifier (max once per ingame month. 3 uses max total)

LASMA ERUPTOR Mk. V

Heavy Weapon (Two-Handed) – Rare+

Requires proficiency in heavy weapons or military ordnance

Overview:

A shoulder-mounted fusion cannon developed during the early Convergence Wars. Superheats condensed ionic slurry and detonates it mid-air. Banned in most city-zones due to "collateral dissolution" reports.

Stats:

- **Type:** Heavy, Two-Handed
 - **Range:** 120 ft (impact) / 240 ft (arcing fire)
 - **Damage:** 10d12 plasma (fire + force)
 - **Reload:** 1 shot per round; 3-shot mag
 - **Weight:** 22 lbs
 - **Saving Throw:** Dex save (DC = 8 + prof + Dex) for half
-

Effects:

- **Plasma Bloom (Action):** Fire a volatile orb that detonates in a **30-ft radius**. Targets in the area take **10d12** plasma damage. Objects and cover in the area are vaporized unless magical or reinforced.
 - **Splash Saturation:** Missed targets within the radius still take **half damage**.
 - **Arc Fire Mode (Optional):** Fire in a high arc to land the shot on enemies behind cover (disadvantage on attack roll, but bypasses line of sight).
 - **Overheat Clause:** After 3 consecutive shots, roll a DC 15 Con save. On failure, the weapon locks for 1 round and deals 4d12 backblast damage to the user.
-

Lore:

Manufactured by **Karmahard Dynamics**, the Eruptor was designed to clear bunkers, blast warbeasts, and utterly deny terrain. Old models had engraved warnings: *“Do Not Fire Near Allies. Or Buildings. Or Self.”*

AEGIS-HELIX LASER LANCE

Energy Rifle – Very Rare

Requires attunement by a character with Intelligence 14+

Overview:

A sleek, long-barrel energy weapon reverse-engineered from Pre-Convergence satellite weapon arrays. The Aegis-Helix channels light into a pinpoint laser that pierces through armor, air, and often—regret.

Stats:

- **Type:** Two-Handed Energy Weapon
 - **Range:** 300 ft line (piercing beam)
 - **Damage:** 6d10 radiant
 - **Recharge:** 1d4 rounds
 - **Weight:** 15 lbs
-

Effects:

- **Focused Lance (Action):** Fire a **laser beam in a straight line 5 ft wide, 300 ft long**. All creatures in the line must make a **Dex save** (DC = 8 + prof + Int). On fail, take **6d10 radiant**. On save, half.
- **Armor-Breach Protocol:** The beam ignores resistance to radiant or nonmagical damage and bypasses cover.

- **Prism Split (Passive):** If fired through light sources (e.g., daylight, magical light), it gains +10 ft width and emits a searing flash: targets who fail the Dex save are **blinded** for 1 round.
-

Lore:

First built by **ARX Protocol** as a ship-to-ship surgical weapon. Now miniaturized for terrestrial use, the Lance is prized among rooftop snipers and battlefield surgeons alike. Known unofficially as "*Sunpiercer*."

Aethryl Timeweaver Frame

Source Organism: Aeon-Sylphs of the Eterna Glade (Elven fey touched by broken timelines)

Stat Boosts (upon Integration):

- +15 Dexterity, +15 Wisdom +10 to Int
 - -500 maximum hit points
-

Core Effects:

- **Temporal Step (Bonus Action):** Instantly rewind your position up to 60 ft to where you stood at the start of your last turn. You take no opportunity attacks on this movement.
 - **Time Dilation Field (Action):** Project a 20-ft radius bubble centered on you. All creatures of your choice in the area have their speed halved and take a –10 penalty to attack rolls and Dexterity saves for 1 minute. Enemies may repeat a Wisdom save (DC = 8 + Prof + Wis) at the end of each of their turns to end the effect early.
-

Passive Traits:

- **Feychron Vision:** You can see into the past echoes of your environment. Gain advantage on Investigation and Perception checks to detect traps, hidden doors, or

recent activity.

- **Split Second Reaction:** When targeted by an attack or harmful effect, you can use your reaction to impose disadvantage on the roll or save; you may do this a number of times equal to your proficiency bonus per long rest.
- **Eternal Reminder:** You age one day for every week you wear this frame, but you are immune to exhaustion and any effects that would force you to sleep or long rest.

Grommash Bloodhigh Frame

Source Organism: Warlord-Titan Orcus Behemoths (Primeval orc chieftains crystallized in Convergence flux)

Stat Boosts (upon Integration):

- +8 Strength, +8 Constitution
 - +250 maximum hit points
-

Core Effects:

- **Heroic Charge (Action):** You dash up to 60 ft in a straight line toward an enemy, plowing through any number of creatures. Each creature you pass through must succeed on a Strength save (DC = 8 + Prof + Str) or be knocked prone and take 40d10 bludgeoning damage (half on success).
 - **Bloodrage Roar (Bonus Action; Recharge 5–6):** Let out a thunderous orc war-cry. All enemies within 15 ft must make a Wisdom save (DC = 20 + Prof + Str) or become frightened for 1 minute. Frightened targets can repeat the save at the end of each of their turns.
-

Passive Traits:

- **Titan's Resilience:** You have resistance to bludgeoning, piercing, and slashing damage from nonmagical attacks and one damage type of your choice to be chosen at each dawn.

- **Warlord's Presence:** Allies within 20 ft gain +10 to damage rolls when attacking a creature you've damaged this turn.
- **Unbreakable Will:** When you fail a saving throw, you can choose to succeed instead. Once used, this trait recharges after you finish a short or long rest.

1. Arcane Reservoir Frame

Source Organism: Aether-Spring Elementals (Primal founts of raw mana trapped in crystalline hosts)

Stat Boost: +2 Intelligence, +1 Constitution

Effect (upon integration):

- **Expanded Mana Matrix:** You gain +2 spell slots of the highest level you can cast (slots refresh on a long rest).
 - **Overflow Discharge (Recharge 5–6):** As a bonus action, you may expend one of these extra slots to deal force damage equal to twice the slot's level to one creature you can see within 60 ft.
-

2. Astral Focus Frame

Source Organism: Star-Worn Seers (Celestial psychics whose minds pierced the veil)

Stat Boost: +2 Wisdom, +1 Dexterity

Effect (upon integration):

- **Steady Mind:** You have advantage on all Constitution saving throws to maintain concentration.
 - **Phase Echo (3 charges, recharge on short rest):** When you are forced to make a concentration check, you may expend 1 charge to succeed automatically.
-

3. Symbiotic Invocation Frame

Source Organism: Convergence-Bound Familiars (Arcane spirits grafted into living hosts)

Stat Boost: +2 Charisma, +1 Constitution

Effect (upon integration):

- **Shared Empowerment:** Whenever you cast a buff or healing spell on an ally (including yourself), that ally gains temporary hit points equal to your Charisma modifier + spell level.
- **Echoed Aid (1/long rest):** Immediately after you finish casting any support spell, you may grant that same spell's effect (at half its level) to one additional ally within 30 ft. without expending a spell slot.

4. Chronomancer Frame

Source Organism: Rift-Tide Chronolorks (Time-wrought arachnids that weave temporal threads)

Stat Boost: +2 Intelligence, +1 Dexterity

Effect (upon integration):

- **Temporal Anchor:** Once per short rest when you cast any spell, you can choose to “anchor” time around yourself. For the next minute you gain +2 bonus to AC and saving throws as reality slows for attackers.
- **Quickened Recall (Recharge 5–6):** Immediately after casting a spell of 1st–3rd level, you may cast that same spell again at no cost (must target a new valid target).

5. Etheric Conduit Frame

Source Organism: Void-Tide Seraphs (Fallen lightborne whose wings became living conduits)

Stat Boost: +2 Charisma, +1 Intelligence

Effect (upon integration):

- **Mana Relay:** Arcane energy you expend charges this frame; whenever you cast a spell of 1st–5th level, store 1 charge (max 5). As a bonus action, you can expend any number of charges to regain a spell slot of equivalent combined level.
 - **Leyline Burst (1/long rest):** Release all stored charges in a 20-ft radius. Creatures of your choice gain temporary hit points equal to twice the number of charges spent; hostile creatures take force damage equal to the same amount.
-

6. Mindforge Frame

Source Organism: Neural-Runic Golems (Living constructs inscribed with thought-forging runes)

Stat Boost: +2 Wisdom, +1 Constitution

Effect (upon integration):

- **Runic Insight:** Once per long rest, you may inscribe a quick rune in your mind as a reaction when you fail an Intelligence, Wisdom, or Charisma saving throw—treat the roll as a 20 instead.
 - **Psionic Backlash (Passive):** Whenever an enemy within 30 ft deals psychic damage to you, they themselves take psychic damage equal to your Wisdom modifier.
-

7. Spectral Ward Frame

Source Organism: Sanctum-Bound Specters (Ethereal guardians consecrated by ancient orders)

Stat Boost: +2 Wisdom, +1 Charisma

Effect (upon integration):

- **Wraithguard Shield:** You can spend a bonus action to summon an ethereal barrier around yourself or an ally within 30 ft. that grants 15 temporary HP. Lasts 1 minute or until depleted (recharge on long rest).
 - **Sanctified Aegis (Passive):** Allies within 10 ft. gain advantage on saving throws against charmed and frightened effects.
-

8. Arcane Glyphframe

Source Organism: Glyph-Forged Automata (Clockwork scribes that etched living spell-runes)

Stat Boost: +2 Intelligence, +1 Wisdom

Effect (upon integration):

- **Quickglyph (3 charges, recharge on short rest):** As a bonus action, inscribe a magical glyph on a surface or creature within 30 ft. On your next turn, you may trigger it to cast *Magic Missile* (1st level) at a target you choose.

- **Permanent Sigil:** Choose one 1st-level divination or utility spell. You can cast it once per long rest without expending a slot by tracing its rune on your skin.

Because I didn't make myself. They did. Vantacore printed my lungs in a blacksite when I was still coughing blood in a riot cell. Genovolve patched my nerves with secondhand angelwire experimental junk meant for commandos who never came back. Obeliska mapped my dreams for 'structural stability' said my nightmares were part of keeping the city intact.

I'm a walking patent war. And every time I breathe, some exec logs the data and sells a better version to a cleaner killer.

The city calls me a hero. They throw my name around like a brand graffiti'd on shuttle walls, whispered in drone-filters.

But you wanna know the punchline?

I didn't save this city. I made it worse. Every corp I ever brought down, three more rose from its corpse like maggots on meat.

I tore out my tracking chip with a rusted spoon. I shut off their kill-switches. I spit battery acid every time I talk too long. But I *still* hear the grid whispering my serial code at night.

You think I hate the corporations?

I *am* one. Just misfiring. Just pissed off enough to cut my own leash.

This city doesn't need heroes. It needs martyrs who know where the wires go—and aren't afraid to rip 'em out with their teeth."

Quantum Aegis Conduit

10th-Level Techno-Arcane Protocol

Casting Time: 1 minute

Range: Self (creates dome centered on you)

Components: V, S, M (a microfusion capacitor worth at least 1,000,000 ¤ , consumed)

Duration: 1 hour (concentration)

Effect

You unleash the pinnacle of techno-arcane engineering, projecting a hemispherical energy dome in a 150-foot radius around your position. The dome shimmers with interlocking force-matrix panels and humming quantum conduits. Its properties are as follows:

- **Impenetrable Shielding.** All damage and effects that originate outside the dome (ranged attacks, spells, area effects) automatically fail to traverse it. Likewise, no creature can teleport, plane shift, or pass through its boundary—friend or foe—unless they succeed on a saving throw against your spell save DC.
 - **Containment Field.** When the dome forms, each creature within must make a Constitution saving throw. On a failure, it is *Restrained* by gravimetric locks and cannot move or take actions other than attempting the same save at the end of each of its turns. On a success, it remains free but cannot leave the dome's boundary.
 - **Life-Support Matrix.** The dome filters air, neutralizes toxins, and regulates temperature: creatures inside are immune to poison, disease, and environmental hazards (extreme heat, cold, vacuum, radiation).
 - **Energy Rebound.** to an amount equivalent to your characters proficiency bonus per round, when a creature inside the dome is struck by an attack or spell, you can use your reaction to reflect half the incoming damage back at the attacker as radiant plasma discharge.
-

Vehicle & Drone Modules

Module	Cost (€)	Effect
Spatial Expansion Hullliner	760,000	Rewrites your vehicle's internal geometry—interior volume increases by 200%, complete with hidden storage niches. Passengers feel cramped outside yet have cavernous room within. (higher volumes are available at much higher costs)
Quantum Blink Drive	488,000	Short-range teleportation module: as an action, teleport your vehicle (or drone) up to 100 ft to any unoccupied space in line of sight. Must reboot for 2 hours before next use.
Adaptive Camouflage Skin	250,000	Nanofabric skin projects real-time environment scans—vehicle or drone becomes effectively invisible to visual, infrared, and low-level radar systems for up to 15 minutes (or until you attack).
Auto-Repair Nanoflux Network	795,000	Hull-infused nanites repair up to 10% of max HP every 5 minutes when stationary. Can be overridden to dump all stored nanites at once, restoring 50% of damaged HP—but then requires 24 hours to recharge.
Signal Scramble Overlord (illegal)	642,000	Emits a rolling EM/quantum noise field in a 200-ft radius. All inbound remote-control signals, hacking attempts, and drone reconnaissance within the field suffer disadvantage, and tracking locks drop automatically.
Hyperdrive Inertia Dampeners	1,110,000	Allows high-G maneuvers at extreme speed—your top speed increases by 25%, and you can take tight turns at full throttle

		without risk of pilot hit-point or vehicle HP damage from g-forces.
Spectral Tracker Uplink	524,000	Installs a covert link to ARX's sensor grid. Automatically pins the three closest hostile vehicles or drones, granting you advantage on attack rolls or pursuit rolls against those targets for 30 minutes.
Wraith Engine Feedback Loop	622,000	Your engine's exhaust doubles as a silent thrust-vector system. While active, engine noise is reduced by 90%, granting advantage on stealth checks, and you can hover in place even on uneven or sloped terrain.
Holo-Rear Display Jammer (illegal)	498,000	Projects an array of false traffic signals, speed-limit signs, or waypoint markers to confuse pursuers. Any vehicle following you must succeed on a DC 18 Intelligence (Technology) check each minute or take a wrong turn.
Traffic Optimizer Module	108,000 ¢	Installs into any vehicle's nav-CPU—automatically plots the fastest route through current gridlock, Improving overall speed and advantage on Dexterity (Vehicle) checks.
Ghost-Relay Beacon	126,500 ¢	Deployable drone-trigger that cloaks a 50-ft. sphere from satellite and drone scans for 10 minutes; perfect for safe-houses or ambush staging.
Electro-Sync Drive	102,000 ¢	Overclocks your engine to tap into city power grid—once per short rest you may boost acceleration, doubling your vehicle's maximum speed for 1 minute (overheat on failed Con save).

Convergence Shielding Array	425,000 ⌘	Hull-mounted energy barrier that grants 500 temporary HP to your vehicle. Recharges automatically if no damage is taken for 1 hour.
------------------------------------	---------------------	---

Data & Consumables

Item	Cost (⌘)	Upgraded Effect
City's Whisper Injectors	60,000	(5 charges) Advanced nanites peel back every layer of encryption within a 2 mile radius—live-stream all channels and gain advantage on any Technology or Insight checks to interpret data.
Fate-Tweak Capsules	44,000	(1 dose) One hour of hyper-cognitive sync with ARX predictive mesh: gain advantage on <i>all</i> Investigation, Technology, and Insight checks, and can reroll one such check per roll. Overdose risks neural feedback (1 level exhaustion).
Gridflux Grenade	65,000	(1 grenade) 900-ft EMP blast that disables drones, spirit-coders, digital locks, and cybernetic implants for 2 rounds (DC 18 Dex save halves). Overload drones within 45 ft. auto-shutdown.
Echo Shroud Vial	58,000	(3 uses) Aerosol cloaks heat, sound, EM, and digital signature for 5 minutes—renders you invisible to sensors, drones, and most magic-detection effects, and grants advantage on Stealth checks while active.

Personal Gear & Implants

Item	Cost (€)	Upgraded Effect
ARX Wrist Terminal Mk VII	150,000	Always-online HUD fused to the city grid: automatically succeed on Perception and Investigation to spot hidden cameras/drones, auto-hack trivial locks (DC 15 Tech), and once per day override nearby security nodes.
Neuro-Sync Headset	250,000	Plug into ARX public-AI: you can cast <i>augury</i> and <i>detect thoughts</i> at will (no components), and once per long rest cast <i>legend lore</i> on any local object or person to glimpse their recent history.
Predictive Visor Overlay	154,000	Ocular firmware calculates every angle: your ranged and Sneak Attack ignore all cover (half, three-quarters, total) and invisibility/displacement effects for 1 hour. Grants +2 bonus to initiative.
Spirit-Coded Processor	150,000	Embeds a machine-spirit granting immunity to psychic damage and all charm/fright effects; once per short rest you can retroactively succeed one failed saving throw against mind-affecting magic.

Item	Cost (€)	Upgraded Effect
Grid-Lock Rifle Upgrade	36,000	Predictive targeting rig: your first two attacks each turn ignore all cover and darkness penalties. On a critical hit, you auto-stun the target (Con save DC 17).
Nano-Firewall Rounds	12,000	(20 rounds) Impact rounds leave a 10 ft radius firewall for 2 rounds. Creatures take 2d6 fire on entry or end turn; the flames also act as difficult terrain .
Data-Spike Blade Coating	24,000	On hit, target must succeed a DC 17 Con save or take 2d12 psychic and be incapacitated until the start of your next turn. Requires coated melee weapon .

Advanced & Tactical Weapons

Neurostatic Caster	78,000	Fires a nonlethal ion burst: 60-ft cone. Creatures must make a DC 18 Int save or be stunned for 1 round. On crit: target loses concentration, if applicable.
Causality Spike Rifle	118,000	Sniper weapon that tags a point in spacetime. Attack once, then deal the same damage again 1 round later to the same target unless they leave line of sight.
Pulse-Sync Sabers (Pair)	102,000	Twin vibroblades synced to combat telemetry. Every 3rd hit in a round becomes a guaranteed crit. Wielder must succeed a DC 15 Con save after each crit or take 1 level of fatigue.
Ghostbyte Rifle	145,000	Fires incorporeal ammo. Ignores AC from armor or cover. On hit: target must make Wis save (DC 16) or be blinded as reality glitches around them for 1 turn.

Experimental Overkill-Class Weapons

Chrono-Shatter Lance

- **Price:** 3,720,000 ¢
- **Type:** Temporal Energy Beam
- **Effect:** Unleash a focused bolt of temporal distortion in a 120 ft line (10 ft wide). Each creature in the line takes **12d100 + 300** force damage (DC 25 Dex save for half).
- **Drawback:** After firing, roll 4d6. If any die shows a 1, you become trapped in a 10-second time loop and lose your next turn.

- **Recharge:** 3 rounds
-

Phase-Resonator Coilgun

- **Price:** 3,900,000 ¢
 - **Type:** Spatial Mass-Driver
 - **Effect:** Fire a condensed mass-driver shell at one target. On hit, the target takes **8d100** force damage and is knocked back up to 90 ft (DC 22 Str save halves damage and knockback).
 - **Drawback:** All metal objects within 30 ft (including your own gear) are pulled toward the blast point—those objects (and you) must succeed on a DC 20 Str save or be dragged 10 ft.
 - **Recharge:** 3 rounds
-

Singularity Grid Cannon

- **Price:** 3,660,000 ¢
 - **Type:** Micro-Singularity Projector
 - **Effect:** Create a localized gravity well (30 ft radius) for 1 round. Creatures inside are pulled to its center (DC 23 Str save to resist) and take **7d100** necrotic damage (DC 19 Con save for half).
 - **Drawback:** All friendly technological devices within 50 ft must make a DC 18 Dex save or be disabled until the end of your next turn.
 - **Recharge:** 4 rounds
-

Quantum Rift Cannon

- **Price:** 7,200,000 ¢

- **Type:** Dimensional Breach Emitter
- **Effect:** Project a 15 ft diameter sphere of rift energy up to 100 ft away. On impact, creatures take **8d100** psychic + **8d100** force damage (DC 24 Wis save for half). The rift remains open for 1 round; any creature entering or exiting it takes **4d20** force damage (no save).
- **Drawback:** The unstable breach strains your own chrono-stabilizers. At the end of your turn, roll 1d10—on a 1–2, you lose all reactions and bonus actions until you finish a long rest.
- **Recharge:** 5 rounds

“Premium Alignment” Services

Fate Alignment Contract (negotiated individually)

ARX will “tune” your personal luck and city variables—granting you one guaranteed reroll on any d20 check per day, tracked through their central grid.

Grid Backup Protocol (subscription)

In the event of catastrophic death, ARX holds a 15-second “city backup” of your biometrics—potentially allowing resurrection or timeline rollback (requires high-tier corporate approval).

Temporal Stasis Sphere

12th-Level Abjuration

Casting Time: 1 action

Range: 1200 ft (sphere, 300-ft radius)

Components: V, S, M (a crystalized moment of “first light” encased in a quantum foil)

Duration: Concentration, up to 1 minute

You tear a bubble in spacetime and trap all within its boundary in perfect stasis—time outside flows normally, but nothing inside may act or be affected.

- **Stasis Field:** Each creature and unattended object in the sphere must succeed on a DC 24 Constitution save (DC = 25 + your proficiency bonus + your Intelligence or Charisma modifier) or be frozen in temporal suspension. Affected targets are incapacitated, immune to all damage and conditions, and cannot travel planes or be targeted by spells or effects from outside. On a successful save, a creature is only slowed: its speed is halved, it cannot take reactions, and it has disadvantage on Dexterity and Intelligence saving throws while within the sphere.
- **Selective Release:** As an action on your turn, you may end the effect on up to one willing creature or object in the sphere, restoring it to normal flow.
- **Temporal Drain:** At the moment of casting, you draw upon your own timeline. You gain one level of exhaustion and your maximum hit points are reduced by an amount equal to 10 times your casting modifier. Both conditions last until you finish a long rest.

Epic Drawback (Mandatory): After the sphere collapses—whether by duration expiring or your concentration ending—roll a d6:

1–2: **Timeline Echo** You are stunned for 1d100 rounds as echoes of frozen time rebound through your mind.

3–4: **Chrono Displacement** Your position shifts randomly: roll separately for X, Y, and Z within 60 ft of your original spot (teleported without provoking opportunity attacks).

5: **Temporal Blindness** You cannot benefit from any time-based or divination magic for 24 hours.

6: **Era Fracture** You permanently lose your highest-level spell slot (you may recover it only via a Wish or equivalent reality-shaping magic).

Temporal Stasis Sphere represents the ultimate defense and prison—a single cast can halt armies or seal away cosmic horrors, but wielding it risks tearing your own thread of existence.

12th-Level Spell – Reality Overwrite

Transmutation

Casting Time: 1 action

Range: 1200 ft (sphere, 300-ft radius)

Components: V, S, M (a fragment of an ancient data-core)

Duration: Instantaneous

You reach beyond the Convergence veil and rewrite fundamental laws of physics within the sphere:

- **Wipe Field:** All creatures and unattended objects in the area must succeed on a Dexterity save (DC = 25 + your proficiency bonus + your Intelligence or Charisma modifier) or have their bodies—or mechanical parts—momentarily dematerialized and then reassembled. On failure, each creature takes **50d100 + 5000 force damage**, and constructs or machines are broken (DC 50 Intelligence save to avoid destruction) and anything reduced to 0HP by this attack is destroyed beyond resurrection or repair.
- **Reality Patch:** After damage is applied, the field “stitches” itself into a protective shell: creatures inside that passed the save gain **immunity to all damage** until the start of your next turn.
- **Volatile Rewiring:** Terrain in the area becomes **difficult terrain**, and any ongoing spells, tech effects, or class features with durations shorter than 1 minute are immediately ended.

Cataclysmic Backlash (Mandatory Drawback): Reality itself resists your rewrite. Immediately after casting, you suffer one of the following (roll d4):

1. **Temporal Hangover:** You skip your next turn as your timeline recovers.
2. **Existential Fracture:** Lose one known spell (any level) until you finish a long rest.
3. **Arcane Blackout:** You cannot cast any spells or use class features for 1 hour.
4. **Reality Wound:** You are **weakened** (–2 to all attack rolls, saves, and checks) until you finish a long rest.

Reality Overwrite stands as the pinnacle of Convergence-era arcana: a single burst that can decimate armies and fortresses but at the cost of the caster’s very grip on existence.

ARX Protocol Item – Smite Overcharger Module

Very Rare (requires attunement by a martial or hybrid class)

A wrist-mounted energy cell with six crystalline charge conduits, each labeled I through VI. When interfaced with a melee weapon or firearm, it grants dedicated “smite” charges—functionally identical to paladin spell slots that surge your attacks with radiant force.

- **Smite Charges (8 total):**
 - 2 × Charge I
 - 2 × Charge III
 - 1 × Charge V
 - 1 × Charge VI
- **Recharge:** All expended charges return at dawn after a 1-hour interface with any ARX nexus terminal.

Overcharger Protocol (Bonus Action):

Expend one Smite Charge of your choice to empower your next successful melee or ranged weapon attack before the end of your turn. You deal extra radiant damage as if you’d expended a spell slot of that level for Divine Smite:

Charge	Radiant Damage
--------	----------------

I	2d8
---	-----

III	4d8 (2d8 + 2d8)
-----	-----------------

V 6d8 (2d8 + 4d8)

VI 7d8 (2d8 + 5d8)

If the target is an undead or fiend, it takes an additional 1d8 radiant.

Below are six ARX-exclusive “arc-tech” gear pieces for spellcasters—rare, high-cost modules that interface directly with the city’s Grid to augment, protect, or weaponize your magic.

ARX Spellgrid Focus Mk II

Cost: 78,000 ¢

Description: A crystalline ocular implant that links your sight to ARX’s predictive model.

Effect:

- Once per turn, when you make an attack roll with a spell, you may spend 1 charge to ignore cover and auto-confirm one critical hit.
 - You store up to 3 charges; regain all on a long rest.
-

ARX Codex Echo Drive

Cost: 102,500 ¢

Description: A wrist-mounted holo-projector that houses a fragment of the Lattice’s spell-matrix.

Effect:

- After casting a spell of 3rd–6th level, you can immediately cast a cantrip you know as a bonus action.

- Once per short rest, you can “echo” a 1st–2nd level spell you’ve just cast (no components, same DC).

ARX Aetheric Node Array

Cost: 165,000 ¢

Description: A series of floating nano-nodes that orbit your person, tethered via a neural uplink cable.

Effect:

- Grants +2 bonus to spell save DC and spell attack rolls.
- Whenever you are targeted by a spell, one node may absorb it—negating the effect and then rebooting after 10 minutes.

ARX Data-Veil Cloak

Cost: 88,750 ¢

Description: A billowing nano-fabric cloak woven with ARX’s signature “ghost code.”

Effect:

- You’re invisible to automated sensors and digital divination (as *nondetection* vs. drones/AI).
- As an action, you can cloak yourself and up to six willing creatures in a 15-ft radius—granting them advantage on Stealth checks and resistance to psychic for 1 minute. (1 use per long rest)

ARX Reality-Weave Gauntlets

Cost: 143,200 ¢

Description: A pair of sleek alloy gloves inscribed with micro-runes that channel convergence energy.

Effect:

- When you cast a spell that creates difficult terrain (e.g. *wall of fire*, *spike growth*), you may choose to instead create a 20-ft sphere of “gravity distortion”: creatures inside have half speed and take 2d6 force damage on entry or exit.
 - Recharge 1 use after finishing a short rest.
-

ARX Convergence Codex Implant

Cost: 210,000 ¢

Description: A subdermal data-jack in your spine containing encrypted protocols from ARX’s secret archives.

Effect:

- Once per day, you can “download” any one 7th–9th level spell into your mind, casting it without material components (uses your highest-level spell slot).
 - After use, you cannot cast spells above 4th level until you finish a long rest.
-

All ARX gear requires a secure data-link attunement ritual at an ARX facility (1 hour) and is flagged on the city grid—unauthorized use may trigger corporate “retrieval” teams.

SPELL SLOT RELATED ONES:

ARX Arcane Reserve Module

Cost: 175,000 ¢

Description: A slim neural interface grafted along your ribcage containing micro-capacitors tuned to spell-grid frequencies.

Effect:

- Grants **+1 5th-level spell slot**.

- Once per long rest, you may expend any spell slot to recharge one lower-level slot of the next two lower levels (e.g. burn a 6th to refresh a 4th and 5th).

ARX Codex Overflow Node

Cost: 220,000 ¢

Description: A crystalline data-node embedded in your cerebellum, wired into the Lattice's "overflow buffer."

Effect:

- You gain **one additional spell slot** at each level from 1st through 3rd.
- After casting three spells in a single turn, you automatically regain one expended slot of 1st–3rd level.

ARX Temporal Slot Expander

Cost: 310,000 ¢

Description: A concentric circuit-weave implanted around your spine, it momentarily borrows future spell capacity.

Effect:

- Once per long rest, you gain **one extra spell slot** of up to 6th level for 24 hours.
- Any slot generated this way counts as one level higher for the purpose of effects (e.g. upcasting, DC scaling), but if you cast it, you must succeed on a DC 18 Int save or suffer two levels of system burnout (disadvantage on Tech checks until remedied).

ARX Etheric Capacitor Array

Cost: 260,000 ¢

Description: A lattice of micro-resonators laminated to your synaptic cortex, keyed to the city's arc-ethereal harmonics.

Effect:

- Grants **+1 4th-level** and **+1 6th-level** spell slot.
 - Whenever you expend a 4th- or 6th-level slot, you may roll a d6; on a 5–6 you immediately recover a slot of one level lower (3rd or 5th, respectively).
-

ARX Mnemonic Reallocation Chip

Cost: 185,000 ⱞ

Description: A bio-silicon implant behind the ear that redistributes your neural “spell cache” in real time.

Effect:

- Gain **+2 2nd-level** spell slots.
 - Once per short rest, you may sacrifice both of those bonus 2nd-level slots to gain **one 5th-level** slot.
-

ARX Singularity Slot Matrix (Prototype)

Cost: 600,000 ⱞ

Description: A micro-gravimetric core strapped to your spine, siphoning convergent energies from a nascent pocket singularity.

Effect:

- Grants **one 10th-level** spell slot.
 - Casting any spell with that slot triggers a singularity surge: roll a DC 20 Constitution save or suffer 4 levels of system burnout (disadvantage on all Techno-Arcanist checks and Int saves for 24 hours).
-

ARX Echo-Amplifier Glyph

Cost: 1,015,000 ⱞ

Description: A translucent wafer etched with convergent-sigils, worn over your spellcasting focus or implanted along your neural data-spine. It siphons residual grid-echoes and literally echoes your arcane signature.

Effect:

- Once per long rest, when you cast any spell of 1st through 9th level, you can activate the Glyph as a reaction to **double** one of the spell's numeric effects (damage dice, healing, temporary HP granted, area radius, duration in rounds, etc.).
- If the doubled effect would exceed the spell's normal maximum (for class features or items that scale), cap at twice that maximum.
- After activation, the Glyph enters **overload**, imposing **Disadvantage** on all spellcasting ability checks and Concentration saves until you finish a short or long rest.

Attunement: Requires 1 hour of synchronization with both your focus and ARX's Grid-Analyzer to calibrate echo-dampeners.

ARX Smiting Resonance Capacitor

Cost: 480,000 

Rarity: Very Rare (requires attunement by a paladin or similar Smite-using class)

Description: A sleek, hexagonal crystal matrix mounted on a bracer or weapon pommel, inscribed with ARX's pulse-sync runes. It stores "resonance charges" harvested from each smite and channels them back into your next strike.

Effect:

- You gain a pool of **charges** equal to your proficiency bonus.
- Whenever you expend a spell slot to Smite (e.g. Divine Smite, Wrathful Smite), you may expend up to **2** resonance charges to **add an extra 2d8 radiant** (or appropriate) damage per charge to that Smite.
- As a bonus action, you can expend **3** resonance charges to regain one expended spell slot of 1st–3rd level (you must still meet any normal requirements to cast that slot).
- The capacitor regains all charges after a long rest.

Genoframe: Voidwalker Frame

Source Organism: Extradimensional Wanderer (an echo of a creature that slips between

realities)

Stat Boost: +4 Stat of your choice -2 Stat of your choice

Effect (upon integration):

- **Void Step (Bonus Action):** Teleport up to 60 ft to an unoccupied space you can see. You ignore difficult terrain and can move through creatures and objects (treat as difficult terrain). If you end in a solid object, you instead appear in the nearest open space and take 1d10 force damage.
- **Spatial Unbound (Passive):** You do not provoke opportunity attacks when moving. You are immune to environmental effects from planar anomalies (e.g. inverted gravity, temporal rifts) as your body momentarily phases around them.
- **Void Strike (Action, Recharge 5–6):** Your next melee or ranged attack ignores all cover, resistances, and immunities (treat immunity as resistance). On a hit, the target takes an extra 10d10 force damage as you punch a temporary hole in reality at the impact point.
- **Ethereal Drift:** Once per short rest, you can shift partially into the Ethereal Plane for 1 minute. While shifted, you have resistance to all damage except force and psychic, and can see into the Material Plane normally.

Flavor:

A sleek, pallid chassis of interlocking plates seems to ripple and bend at the edges, as though reality itself recoils from contact. Tendrils of static distortion crawl across its surface whenever it activates its Void Step, leaving behind brief afterimages of where it once stood.

Fate-Lock Protocol

7th-Level Divination (ARX Protocol)

Casting Time: 1 action

Range: 60 ft

Components: V, S, M (a looped silver band inscribed with a probability sequence)

Duration: Concentration, up to 1 minute (**Does not take up a concentration slot**)

You anchor a target's destiny to a predicted outcome calculated by the city's quantum lattice. Choose one creature within range. Until the spell ends, the following effects apply:

- **Fate Anchored:** The target cannot benefit from advantage on **any** d20 roll. If the target rerolls any die (via Luck, Portent, Legendary Resistance, etc.), it must keep the new result no further rerolls apply.

- **Failure Forecast:** The first time the target fails a saving throw each round, they take 10d10 psychic damage as fate itself reinforces their predicted loss.
- **Prediction Burn (Optional Use):** As a reaction, once during the spell's duration, you can force the target to **automatically fail** a saving throw or ability check. Once this ability is used, the spell immediately ends.

At Higher Levels: *Fate-Lock Protocol* cannot be cast using higher-level slots. It is restricted by ARX system keys or fate-aligned spell engines.

Perfect. Here's "**Providence of God**" restructured as a **four-turn escalating divine event**, with each round progressing the eye's awakening—stacking **devastation**, **buffs**, **debuffs**, and **cosmic judgment** until **only one remains**. This version is less a spell and more a **god-tier protocol of divine annihilation**.

Providence of God

10th-Level Evocation (Divine Protocol)

Casting Time: 1 action

Range: 300 ft (Center Point)

Components: V, S, M (three relics of martyrs, burned together in sacred flame)

Duration: 4 rounds (concentration)

"It is not wrath. It is reckoning."

– Last words of Archon-Magus Virel before triggering *Providence of God*

Overview

Once cast, *Providence of God* initiates a four-round divine unfolding. Each round, the **Eye of Providence** opens further in the sky above the chosen point (300 ft range), altering the battlefield drastically. Its effects **stack**, **escalate**, and **ignore resistances and immunities** unless otherwise stated.

Only one creature may be left standing when the eye fully opens. All others are **unworthy**.

ROUND 1: The Eye Cracks

A thin, golden fissure appears in the sky above, pulsing with silent pressure.

- **Enemies** in a 200-ft radius make a **DC 45 Wisdom save**. On fail:
 - They suffer **50d20 radiant** damage and are **frightened** until the end of their next turn.
 - They cannot benefit from buffs or healing from allies while frightened.
 - **Allies** gain:
 - **+3 to attack rolls and saving throws** for the spell's duration.
 - Their vision pierces magical darkness and illusions for 60 ft.
-

ROUND 2: The Eye Opens

A golden vertical iris unfolds slowly. Reality grows brittle.

- **Enemies** in a 250-ft radius must make a **DC 45 Constitution save** or:
 - Take **60d20 radiant + 60d20 force** damage.
 - Be **blinded** and **deafened** for 1 minute (repeat save at end of each turn).
 - Lose all **resistances** for 1 minute.
 - **Allies** gain:
 - **+4 to attack rolls, saving throws, and damage rolls**.
 - **Immunity to all negative effects except those from beings higher or equal to God**
 - All attacks **deal an additional 2d20 radiant damage**.
-

ROUND 3: The Eye Watches

The iris locks onto all who still stand. Their souls are weighed.

- **Enemies** in a 300-ft radius:
 - Make a **DC 50 Charisma save** or be **marked**—each marked creature becomes visible through walls, invisibility, and illusions.
 - Marked enemies take **double damage from radiant sources**.
 - Marked enemies **cannot gain advantage** from any source.
 - Those reduced to 0 HP this round **cannot be resurrected** unless by a wish or divine-level effect.
 - **Allies:**
 - Regain **300 HP at the start of their turns**.
 - May reroll one failed saving throw per round.
 - Their critical hits **explode**—rolling 5 additional damage dice that can also crit.
-

ROUND 4: The Eye Judges

The sky ruptures. The Eye is fully open. There is no more time.

- **A beam of annihilation** erupts from the Eye in a **300-ft radius sphere** centered on the spell's original target.
- All creatures in the radius must make a **DC 50 Dexterity save**.
 - On a **failure**: take **50d20 radiant + 50d20 force** damage + **5,000 Divine Damage**, are **permanently blinded**, and turned to ash if reduced to 0 HP.
 - On a **success**: take **half damage**, but lose the ability to cast spells or use magic items until the end of their next turn.
- **Only one creature can remain conscious in the area**. If more than one survives:
 - Each makes a **Charisma saving throw (DC 50)**.
 - The lowest result is instantly **banished from reality**, cast into a Divine Echo Realm (no save).

Drawback: The Cost of Providence

The caster cannot cast spells, use abilities, or regain hit points for **7 days**.

They are marked with a **halo brand** visible to all divine, celestial, and infernal beings.

They can now **be targeted by gods** and **cannot be hidden** by any means.

The bell never rang. It wasn't a match—it was a message. The Wolf stepped into the ring without ceremony, no gloves, no entourage. Just bone, blood, and the cold promise of violence. Ten cyber fighters waited combat-grade, neural-latched, with reinforced chassis and reflex-overdrive augments that could drop a man before his heartbeat finished. But he didn't slow. Didn't speak. He rolled his wrists, exhaled, and walked into hell like it owed him rent.

The first two went down in under five seconds. A jab-cross combo that cratered the cheekbone of one, a pivot-knee to the floating ribs of the other. No wasted motion. No flourish. Just surgical force. The third came in low, an uppercut charged by a wrist-turbine. The Wolf weaved inside, elbowed the hinge-joint, and turned the man's arm into a limp whip, before driving a hook into the base of his neck. Dead weight.

Four through six tried to flank him. One landed a hit—a glancing blow to the ribs that earned a grunt. But The Wolf caught the next punch mid-flight, twisted the limb until servos screamed, and drove his forehead into the attacker's nose with a crack that echoed through concrete. He kicked the next one's knee sideways, collapsing the leg like a folding chair, then stomped the spine. The sixth? Thrown—overhead—into the arena wall. No need to check if he got back up. He didn't.

Seven charged blind with a shriek and twin cyber-claws. The Wolf ducked low, rose with a brutal left hook that tore teeth from the man's skull, then caught the next fighter's punch and pulled him into a brutal clinch. Eight punches in four seconds. Each a textbook demonstration of force multiplication. The man slumped with his eyes still open.

That left nine and ten.

They looked at each other. One bolted. The Wolf didn't chase him—just sidestepped the last and hit him with a liver shot so clean it stopped his heart for three seconds. As the man collapsed, retching coolant and blood, The Wolf stood over the center of the ring. Oil stained his fists. Sparks hissed from broken limbs.

He looked into the skybox, where the corp cameras blinked and the sponsors watched behind mirrored glass.

“Ten soldiers. Sixty seconds. And you still think I’m the weapon that needs leashing?”

He turned his back on the silence and walked out.

Message received.

“This city is rotten to the core. No polish, no chrome can cover that stench. I’ve seen the truth, and it isn’t broadcasted on your feeds or printed in their contracts. It’s buried—under the neon, under the slogans, under the corpses that built these towers.”

He tilts his head toward the skybox. Everyone knows who he’s looking at.

“Inari. I know you’re watching.”

“You own this floor. You built the Coalition to give the people hope, and for a time, you did. But hope without action is just a delay on despair. You’ve stayed clean while the rest of us drown. You stayed neutral while the megacorps carved their initials into the bones of this city. And still—every soul down here whispers your name like a prayer. Like maybe you’re the one who’ll finally tip the scale.”

He takes a step forward, hand still open, blood still dripping.

“I didn’t come here to fight. This wasn’t a match. This was a message. Ten cybernetic predators entered this ring tonight. And they fell—not because I’m some untouchable god—but because they fight for profit. I fight for something else.”

He looks around the stunned crowd—hardened operators, washed-out boxers, data runners and street saints.

“Don’t you see it? Their strength is synthetic. Borrowed. Bought. Mine is earned. And I’m not the only one. There’s a fire waking up in this city. And soon, those who claim control will find out what it feels like to be caged by the very system they built.”

He raises his voice now—not shouting, not preaching. Just a storm breaking the surface.

“Inari. You’ve walked the line for too long. There’s no middle anymore. Not here. Not in this war. The people are dying in protocols and debt. The corps are playing gods with stolen futures. You can’t call yourself righteous while sipping silence from a golden glass.”

A pause. His eyes lock onto the glass between them.

“So I’ll ask you once. And only once.”

He points again. Slow. Final.

“Where do you stand—when the last lie dies and the truth demands blood?”

7. LUCIDO PRIME

Slogan: *“What You Know Is Who You Are.”*

Domain: Information Control, Memory Curation, Societal Reprogramming

Vibe: OpenAI x Black Mesa x Eternal Sunshine of the Spotless Mind

Details:

Lucido Prime is the city’s keeper of identity its archivist, censor, and editor-in-chief. Their true product is *memory*. Not just information storage, but tailored recall, enforced amnesia, and synthetic experience generation. While ARX shapes probability, Lucido shapes *perception*. They manage digital afterlives, rewrite pasts, sell pre-loaded memories, and curate entire identity chains for the elite.

To speak truth in Lucido territory is to risk deletion. Their operatives known as **Archivists** can “unwrite” you from someone’s memory in real time. Their greatest weapon isn’t violence it’s *forgetting*.

Known for: Neural blackboxes, memory-forged personas, anti-narrative implants, “pre-trauma” therapy, and licensed reality construction.

Their motto is no idle claim: to Lucido, personality is *data*, and data is *property*.

Secret Project: MNEMODUS — a full-scope city simulation composed of harvested memories from 98% of the population, used to predict uprisings, manufacture consent, and run “test timelines” of potential futures.

Rumored: No executive has a true origin they are constructs of remembered brilliance, grafted from philosophers, tacticians, and dead gods. Some say Lucido’s boardroom doesn’t even exist in this reality but only in memory.

Why It Belongs:

- Vantacore commands force.
- ARX controls infrastructure.

- NoxTech rules mind and emotion.
- Obeliska binds reality.
- Karmahard sells weapons of war.
- Genovolve rewrites the body.
Lucido Prime owns who you *used to be*.

Need a unit? Think of “**Redactors**” in black neural-shielded coats, erasing someone’s memories mid-fight.

Need a product? *Curated trauma packs* for soldiers needing to *remember* pain to fight better. *Marital overwrite suites*. *Wipe-and-replace fugue drives*.

Lucido isn’t just dystopia. Lucido is the death of continuity—and the selling of new ones.

"Oh. There you are."

A figure steps in—barefoot, despite the metallic floor. Pale gloves. Surgical apron repurposed into a ribboned coat. Eyes wide with the innocent intensity of a predator in a child’s mask.

"You’re all very symmetrical. I like that. It means I won’t have to start from scratch if you... break."

She smiles sweetly. Not cruel. Not mocking. Just... delighted.

"My name is Dr. Evira, but you may call me Vivi. Everyone does, eventually. I used to work in gene stability across layered realities, but I got tired of waiting for permission to make things better. So now I... freelance."

A pause. She tilts her head, watching someone exhale too loudly.

"Don’t worry. I only modify people after they say yes. Probably."

She claps her hands gently—once.

"Anyway! I like solving problems. Especially organic ones. Especially when they scream first."

A blink. Smile still fixed. Her fingers twitch like they’re eager to sculpt.

"Let’s get along, yes? I promise not to touch anything important... unless it wants to be touched."

Absolutely. Here's your **Legendary²-tier** magic item: a devastating fusion of **grace, gunpowder, and ghostly conviction**—a shotgun-katana wielded by the last vow-bound warrior of a broken world.

[Legendary Weapon]

“Honorbarrel: The Shotō-no-Kami”

Gunblade (Katana-Shotgun hybrid), artifact (requires attunement by a creature with a code of honor or battlefield purpose)

*"When words break, let steel speak. When steel breaks, let fire answer."
—Inscription on the inner slide*

Weapon Type:

- Counts as a **versatile melee weapon (5d10 slashing)** and **ranged weapon (8d12 piercing, 30/90 ft scatter blast)**
 - Requires **Strength or Dexterity 30**, or equivalent augmentation to wield properly
 - **Ammunition:** Automatically generates ethereal buckshot (no reload needed) once per turn
 - Gun and blade strike **as one**—each attack can include both a slash and a blast as part of the same action
-

Appearance

A matte-black katana, etched with kanji that flicker between **Bushido scripture and kill-counts**, its edge faintly glowing with **celestial-grade tungsten**. The grip is wrapped in ceramite cloth. Beneath the tsuba: a **breach-loaded shotgun chamber**, humming with runic shells. When swung, it **crackles like a railgun**, and when fired, it **roars like a dragon's warcry**.

◆ Abilities

1. Double Honor — Twin Truths

When you **take the Attack action**, you may **strike once with the blade and once with the barrel** in the same action. These are treated as separate attacks (melee and ranged), and **both are rolled with advantage** if you have not broken a vow, truce, or personal code this week.

- If both attacks hit the same target: they take an **additional 8d10 radiant damage** as their fate is sealed by sword and shot.
-

2. Bushido Orayo! - Fire Discipline

Once per long rest, you can enter a **Bushido stance** as a bonus action. For 1 minute:

- You can make an **extra attack per turn** (total of 3 attacks if dual striking).
 - Your movement leaves behind **afterimages**, making the first attack against you each round made at disadvantage.
 - Every **third attack** (hit or miss) becomes a **Critical Shot**, dealing double damage and **exploding** in a 10 ft radius (Dex save or take 4d8 force).
-

3. Vow-Recoil Engine

When you are reduced to 0 HP, your grip tightens by instinct. Once per long rest:

- You make a **final strike before falling**. Choose:
 - **Judgement Slash** – An AOE arc in a 40 ft cone. Creatures take 30d10 slashing and radiant damage. On a fail (Dex save), they are **silenced** for 1 round.
 - **Last Shell Sermon** – Fires a **burning slug** through one enemy and into the next plane. They must make a Charisma saving throw (DC 20 + Ability Mod). On a fail, they are **banished to the realm of the unworthy** for 1 minute, screaming.

You fall unconscious after, but may reroll one death save immediately.

4. Loadout: Shells of Will

*Honorbarrel holds 3 **Shells of Will** per long rest. These can be expended to:*

- **Shell of Redemption** – *Your next gunblast heals allies for half the damage dealt to enemies.*
 - **Shell of Vengeance** – *Instantly reloads and allows a **reactionary ranged attack** if an ally drops to 0 HP within 60 ft.*
 - **Shell of Silence** – *Fires a silent shell that **disables spellcasting** for 1 round on hit (Con save to resist).*
-

5. The Blade Remembers

*Every time you kill someone who betrayed an oath (paladin-fallen, deserter, betrayer, corrupt officer, etc.), the blade **records it**. When the kill count reaches a number divisible by 7, you may **ask the blade one question**. It responds with **divine insight**, or if the GM chooses, a **cryptic vision**.*

At 77 kills, it glows with searing truth, granting:

- **True Sight (120 ft)**
- **Immunity to all psychological effects**
- *The ability to speak **any vow or prophecy** aloud and have it be **understood by all creatures in earshot**, regardless of language*

At 777 it grants

At 7777 it Transforms into an Artifact

Cursed Feature (Optional GM Hook)

*If the wielder **ever breaks their code**, the shotgun jams. The blade dulls. And the spirits of those it judged begin to whisper—you **become haunted**, and the weapon demands redemption through a grand act of sacrifice or selfless honor before it can be used again.*

[Legendary Artifact Weapon]

“Dishonorbarrel: The Shotō-no-Makai”

Gunblade (Katana-Shotgun hybrid), artifact (requires attunement by a creature who has broken a sacred vow or sworn a pact of damnation)

“When vows rot, let violence vindicate. When mercy falters, let mayhem reign.”
—Carved beneath the breach, in Infernal script scorched over celestial etchings

Weapon Type

- Counts as a **versatile melee weapon** (5d10 **necrotic slashing**)
 - Also a **ranged weapon** (8d12 **force damage**, 60/180 ft *rupture shot*)
 - Requires **Strength or Dexterity 30**, or an equivalent augmentation or pact to wield.
 - **Ethereal ammunition** is generated from your soul’s torment—no reload needed, once per turn.
 - Each attack can **combine a slash and a blast** in the same action.
-

◆ Appearance

A pitch-dark katana forged from **void-forged tungsten and infernal spinal plating**. Its edge bleeds whispers, and when swung, it distorts the air like a heat mirage from hell. The hilt is wrapped in chainmail made of oathbound teeth. The shotgun mechanism crackles with **abyssal**

fire, and instead of roaring like a dragon—it **screams like a choir of dishonored knights being executed**.

Abilities

1. Twin Blasphemies

You speak in violence. You breathe in war.

When you take the Attack action, you may strike once with blade and once with barrel. If both hit the same target:

- They take **8d10 necrotic and force** damage.
- If the creature is under an oath or magical pact: it suffers **disadvantage on saves vs fear, charm, or control** for 1 minute.

If you've broken an oath within the last 7 days, you **roll both attacks with advantage**.

2. Hellmarch: Makai Discipline (1/long rest)

You don't stand for honor. You march to unmake it.

As a bonus action, enter the **Hellmarch stance** for 1 minute:

- You make **3 attacks per action** if combining blade & blast.
 - You leave **burning afterimages**—hostile creatures in melee take **4d10 psychic damage** when they miss you.
 - **Every third attack** becomes a **Black Verdict**—a critical hit that explodes in a 30 ft radius (Dex Save, 18, or take **6d8 force & necrotic**).
 - You ignore resistance to necrotic, force, and radiant damage.
-

3. 🔥 Fell Recoil Engine (1/long rest)

When your body falls, your war does not.

When reduced to 0 HP:

- Choose one of the following *last rites* to unleash before unconsciousness:

Fell Judgement Slash – A 60 ft cone of chaos. Enemies take **40d10 slashing + necrotic**. On a failed Dex save (DC 22), they also lose **one reaction** and suffer **permanent psychic scarring** (disadvantage on Insight or Persuasion for 24 hrs).

Makai Slug Sermon – Fires a slug so dense it *tears a rift*. The target must succeed a **Charisma save** (DC 22) or be **sent to a pocket realm of shame**, howling their sins across planes for 1 minute.

Then immediately:

- Roll one **Death Save** (with advantage).
- If you fail, you still **stand for 1 round** at 1 HP.

4. **Bloodload: Shells of Wrath (3/long rest)**

These infernal shells are bound to your **resentment**:

- **Shell of Betrayal** – Your next blast causes **double damage** to any creature under oath, pact, or divine blessing.
- **Shell of Scorn** – You may **counterattack immediately** when missed in melee, firing a no-save burst dealing **6d8 force**.
- **Shell of Silence** – Fires a buckshot of *forgotten names*. On hit, the creature must succeed a **Wisdom Save** (DC 20) or forget one known spell or ability for 1 minute.

5. **The Blade Keeps Score**

Each time you kill a **creature of honor**, **exalted oath**, or **divine alignment**, the blade **records their name in reverse flame**.

- At **kill count divisible by 9**, you may ask the blade a question—it replies with *damning insight* or *visions of ruin*.
 - At **99 kills**: You gain **Truesight 120 ft**, **Immunity to Divine Magic**, and may **speak any threat aloud**—it is *understood by all creatures* within 300 ft.
 - At **999 kills**: Your soul fuses partially with the weapon. You become immune to **charm, fear, and possession**, and all weapon attacks deal **force AND necrotic** simultaneously.
 - At **9999 kills**: The weapon becomes a **Legendary Artifact of World-Ending Caliber**. You and it are no longer separate entities.
-

Cursed Feature — “You Made This Bed”

If the wielder **redeems** themselves—turns toward honor or mercy—the gunblade **seizes in protest**. The blade **cracks**, and the shotgun **backfires** the next time it is used, dealing **10d10 psychic damage** to the wielder and removing access to all Shells of Wrath.

To repair this, one must:

- **Break a divine oath**
- **Slay a creature of legendary virtue**
- Or **willingly damn an innocent soul**

Only then does the blade trust you again.

THE KNIGHTS OF THE ROUND

King Arthur

- **Traits:** Noble, visionary, tragic king
 - **Stereotype:** The doomed idealist-king, leader of a dream that fails
 - **Weapon: Excalibur** – Legendary sword of kingship, sometimes gifted by the Lady of the Lake. Said to blind enemies when drawn and shine with divine authority.
-

Sir Lancelot du Lac

- **Traits:** Fierce, romantic, tormented
 - **Stereotype:** The flawless knight undone by love
 - **Weapon: Arondight** – A peerless sword gifted by the Lady of the Lake (in some versions), reflecting Lancelot's unmatched martial skill and chivalric burden.
-

Sir Gawain

- **Traits:** Loyal, proud, fiery
 - **Stereotype:** The honorable knight whose flaws test his faith
 - **Weapon: Galatine** – Often considered his personal blade; fiery and radiant, symbolizing his fiery temper and virtue
 - **Fun Note:** In *Sir Gawain and the Green Knight*, he also bears a green shield emblazoned with a pentangle.
-

Sir Percival

- **Traits:** Innocent, humble, pure-hearted
 - **Stereotype:** The spiritual novice who matures through failure
 - **Weapon:** **Simple longsword or lance** – Unadorned and symbolic of his humility
 - **Symbol:** Seeker of the Grail before Galahad took the role in later texts
-

Sir Galahad

- **Traits:** Pure, divine, distant
 - **Stereotype:** The unattainable ideal—perfect but untouchable
 - **Weapon:** **Unnamed holy sword** – Sometimes drawn from a stone or from a floating block; only he can wield it
 - **Symbol:** The sword of divine right; linked with divine providence
-

Sir Gaheris

- **Traits:** Loyal, dutiful, overshadowed
 - **Stereotype:** The silent knight—present but never central
 - **Weapon:** **Arming sword or mace** – Often described with traditional knight's arms
 - **Symbol:** Functions as support to his more famous brothers (Gawain, Gareth)
-

Sir Gareth (Beaumains)

- **Traits:** Humble, kind, rising star
- **Stereotype:** The unsung hero who earns his place through deeds, not name

- **Weapon: Unnamed sword**, likely earned on his journey (reflects his “anonymous” start)
 - **Note:** Known for defeating the Red Knight and proving himself worthy of knighthood
-

Sir Mordred

- **Traits:** Bitter, cunning, ambitious
 - **Stereotype:** The betrayer, the usurper—Arthur's own blood turned against him
 - **Weapon: Clarent (in some legends)** – The **Sword of Peace**, stolen from Arthur to slay him—a symbolic betrayal
 - **Note:** Often uses a twisted version of Arthur's nobility
-

Sir Tristan (Tristram)

- **Traits:** Romantic, loyal, doomed
 - **Stereotype:** The star-crossed lover—tragedy and talent entwined
 - **Weapon: Hearthguard** (in some stories) – A curved or foreign blade, matching his more exotic backstory
 - **Note:** Known for his musical ability and love of Isolde
-

Sir Kay

- **Traits:** Sarcastic, harsh, loyal
- **Stereotype:** The abrasive older brother type—crude but dependable
- **Weapon: Broad longsword**, occasionally paired with a spear

- **Note:** In Welsh lore, he had supernatural traits—long breath, fire-hand, unkillable for a day
-

Sir Bors the Younger

- **Traits:** Righteous, disciplined, penitent
 - **Stereotype:** The man torn between moral conflict and divine duty
 - **Weapon:** **Standard knightly sword and shield**
 - **Symbol:** The only knight besides Galahad and Percival to glimpse the Grail and return alive
-

Sir Bedivere

- **Traits:** Loyal, grieving, faithful to the end
 - **Stereotype:** The last knight—the one who remains when all others fall
 - **Weapon:** **Broad, heavy sword**, possibly ceremonial
 - **Note:** Most famous for returning Excalibur to the Lady of the Lake after Arthur's death
-

Sir Ector (Arthur's foster father)

- **Traits:** Honest, grounded, wise
 - **Stereotype:** The common man in a court of legends
 - **Weapon:** **None notable** – More mentor than warrior
 - **Note:** Raised Arthur without knowing his destiny
-

⚙️ Sir Lucan the Butler

- **Traits:** Dutiful, practical, sacrificial
- **Stereotype:** The silent servant-hero
- **Weapon:** **None specified**, likely a longsword
- **Note:** Dies trying to carry Arthur from the battlefield—his guts spill from his wound, and he still tries to stand

Item	Cost (£)	Type	Description & Effect
Soulfire Stim Injector	54,000	Consumable (1 dose)	A syringe of crimson, soul-bound nanofluid. Upon injection, you gain +20d6 fire damage on your next three weapon or spell attacks and resistance to cold for 1 minute. Overdose causes 1d6 necrotic recoil damage per attack rolled.
Bloodspike Adrenal Amp	18,500	Consumable (1 dose)	A bitter, black broth that floods your veins with combat ligaments. You gain +20 ft speed , advantage on Strength checks , and ignore difficult terrain for 1 minute. At end, you suffer exhaustion level 1 as your muscles collapse from the strain.
Echo Cinder Charge	42,000	Explosive (1 charge)	A smoke-ring grenade laced with nano-phlogiston. On detonation (15-ft radius), creatures in the area explode in fiery afterimages 12d8 fire + 12d8 psychic (Dex save DC 18 for half). The lingering

smoke grants **heavily obscured** terrain for 1 minute.

War-Mourn Devastator	58,000	Explosive (1 unit)	A hefted canister that, when triggered, spews 12 arc-flechettes in a 60-ft cone. Each flechette deals 12d6 force (Dex save DC 17 for half). Survivors within 10 ft of any hit also gain 1 level of system burnout (disadvantage on Tech checks) until repaired.
-----------------------------	--------	--------------------	--

Aegis Rune Shield Emitter	120,000	Deployable Shield	A disc etched with binding runes. As an action, plant it on any hard surface—creates a 20-ft hemispherical barrier of arc-force (200 temporary HP) for 1 minute. While active, projectiles slow to half speed on entry (ranged attacks made within gain +2 AC). Recharge on short rest.
----------------------------------	---------	-------------------	--

Wrathbound Automaton Turret	210,000	Deployable Turret	A tripod-mounted, soul-forged heavy repeater. Deploy as an action; it auto-fires three 12d10 piercing gauss-bursts per round at the nearest hostile (range 150 ft) for 15 minute or until destroyed (HP 100, AC 16). On destruction it erupts in 20d20 force (Dex save DC 18 for half).
------------------------------------	---------	-------------------	---

Ammo Type	Cost (¢/10 rounds)	Effect
Phantom Shard Flechette	48,000	Each round embeds a micro-eidolon shard. On hit, target takes an extra 2d6 psychic damage; if reduced to 0 HP, the shard “haunts” them—roll a d6: on a 1–3 they remain

incapacitated by spectral visions until they succeed on a DC 17 Wis save.

Oblivion Corrosive Slugs	32,000	Slugs deliver 8d6 acid damage on impact and leave a corrosive residue: the target's armor/gear takes a cumulative –1 AC per hit (max –5) until neutralized by an acid-buffering solvent.
Void-Tear Anti-Matter Rounds	45,000	Rounds punch a miniature anti-matter tunnel through matter. On hit, target takes 8d8 force + 8d8 radiant damage. If fired into cover or barrier, they ignore all cover and destroy up to 10 ft of non-reinforced material.
Chrono-Slip Tracers	54,000	Tracer rounds that momentarily distort time. On hit, target must succeed on a DC 18 Dex save or lose their next reaction and have their movement halved until the start of their next turn.
Infernal Ember Rounds	27,000	Incendiary casings that ignite on impact: 2d6 fire per hit plus a 5-ft ring of molten embers, dealing 1d6 fire to anyone who enters or ends their turn in it. Lasts 2 rounds.
Phase-Pierce Sabots	65,000	Rounds coated with phase-stabilizer. On a hit, the projectile phases through armor: target takes 5d6 piercing ignoring all non-magical resistances, and the next attack against that target has advantage (one use).

Custom Feats for the Convergence Era

"War is the field where all flowers are trampled—yet it is also where the strongest roots are born. I do not love war. I endure it. I step into its blaze not for glory, but to protect what must not burn. Every sword I raise, I mourn. Every life I end, I remember. But so long as there are gardens worth defending, I will not sheathe my blade."

(He pauses, watching the soldier closely—the stiffness in his shoulders, the stillness that aches to collapse. Then, quieter, kinder—)

"You wear your fatigue like armor now. Well-polished. Hardened. But even steel forgets how to breathe when it's worn too long."

"I have seen men smile through shattered hearts, laugh with hands still trembling from the weight of the last name they carved into the dirt. I know what it is to wake up and dread surviving the next sunrise. So do not pretend the war has not cost you. Not to me. Not to someone who has wept beneath banners just like you."

"But still—I walk. Not because I crave battle. Gods, no. But because beauty must be defended by those willing to bleed for it. Not beauty in marble towers or silken robes... but the beauty in children who do not yet know what a battlefield smells like. The beauty in lovers who still believe in tomorrow. The beauty in a quiet moment, shared without fear."

"That is what I fight for. That is what makes this burden endurable."

(He glances at his blade—worn, blood-stained, but cradled gently.)

"A flower may bloom in the shadow of the sword. It may grow twisted, but it grows. And if you've nothing left to believe in, believe in that. Let that be your root."

1. War-Spirit Armorer (2m)

Corp: Karmahard Dynamics

Prerequisite: Proficiency with heavy firearms or martial weapons

Benefit:

- When you deal damage with a Karmahard-branded weapon, you gain temporary HP equal to half the damage dealt (once per turn).
 - You may reload or chamber another round as part of the same attack action (no extra action).
-

2. Cursed Ballistics (1.6m)

Corp: Karmahard Dynamics

Prerequisite: Proficiency with firearms

Benefit:

- Once per short rest, when you hit a creature with a ranged attack, you can mark it with a **Rune of Condemnation**. Until your next turn, that creature takes an extra 10d8 necrotic damage whenever it's hit by any attack.
 - Enemies marked this way have disadvantage on saving throws against fear or paralysis.
-

3. Ghost-Relay Operative

Corp: ARX Protocol

Prerequisite: Dexterity 13+, proficiency in Technology

Benefit:

- You can deploy a mini Ghost-Relay Beacon on your turn (no action). It cloaks a 10-ft sphere from digital detection for 1 minute. Recharge on a short rest.
 - While within a Ghost-Relay zone you created, you have advantage on Stealth checks and are immune to scrying or tracking effects.
-

4. Data-Wraith Hacker

Corp: ARX Protocol

Prerequisite: Intelligence 13+, proficiency in Intelligence (Technology)

Benefit:

- Once per long rest, you can overwrite one active magical or technological effect on a target within 60 ft.: the target must succeed on an Intelligence saving throw (DC = 8 + your proficiency + your Int mod) or lose that effect for 1 minute.
 - You gain a +2 bonus to any Intelligence (Technology) check made to bypass or disable locks, firewalls, or security nodes.
-

Alloy-Blade Adept (3.2M)

General / Vantacore Systems

Prerequisite: Strength or Dexterity 13+, proficiency with martial melee weapons

Benefit:

- When you score a critical hit with a sword or polearm, you may immediately move up to 100 ft without provoking opportunity attacks and make one additional attack at your highest bonus. (Max once per turn)
 - Your chosen weapon counts as magical for overcoming resistances, and deals an extra $Xd12$ lightning damage on a hit where X is the amount of attacks already landed this turn
-

6. Shockwave Scion

General / Obeliska Global

Prerequisite: Proficiency with shields or heavy armor

Benefit:

- When you use your Reaction to Interpose (shield block, etc.), you emit a 10-ft shockwave: each creature within range must make a Constitution save (DC = 8 + your proficiency + your Con mod) or be knocked prone.
 - You gain resistance to force and thunder damage while wielding a shield.
-

7. Bio-Conduit

Corp: Genovolve Initiative

Prerequisite: Constitution 13+, proficiency in Medicine or Technology

Benefit:

- You can, as an action, inject yourself or an ally (within 5 ft) with adaptive nanites: target gains temporary HP equal to your Constitution modifier + proficiency bonus. Recharge on a short rest. (3 Uses)
 - You have advantage on saving throws against disease, poison, and genetic chaos effects.
-

8. Second-Skin Reflexes

Corp: Genovolve Initiative

Prerequisite: Dexterity 13+, proficiency in Acrobatics or Sleight of Hand

Benefit:

- You can, when hit by an attack you can see, use your Reaction to reduce that damage by an amount equal to your Dexterity modifier + proficiency bonus. You can use this feature a number of times per long rest equal to your proficiency bonus.
 - While you have no magical armor, your base AC increases by 1.
-

Quantum Catalyst (5.2M)

Source: LP Protocol Division

Prerequisite: Ability to cast at least one 5th-level spell

Benefit:

- **Arcane Overload:** Once per long rest, when you cast a spell of 1st–5th level, you can channel excess Convergence energy into it. That spell's damage dice roll one step higher (e.g. d6→d8, d8→d10) and its save DC increases by +10.
- **Cascade Protocol:** Whenever you deal damage with a spell, you gain a stack of Convergence Residue (max 9). As a bonus action, you can expend any number of stacks to regain a spell slot of that level or lower (one stack per slot level restored). Residue expires after 1 minute if unused.
- **Protocol Resilience:** You have advantage on saving throws to maintain concentration on spells while below half your hit points and all spells half double duration.

Electro-Fusilade

Prerequisite: Proficiency with firearms

You've mastered the arc-driven weaponry of Karmahard Dynamics.

- **Overcharged Volley:** When you take the Attack action with a firearm, you can forgo one attack to supercharge the next: that shot ignores all cover, treats its damage dice as maximized, and applies an additional 4d10 lightning damage. You can use this feature a number of times per long rest equal to your proficiency bonus.
- **Arc Shielding:** Whenever you hit with a firearm attack, you gain temporary hit points equal to half the damage dealt (rounded up). (Max 400)

Blademaster Overdrive

Source: Blackmarket

Prerequisite: Strength 15, proficiency with melee weapons

Benefit:

- **Overdrive Strike:** Once per short rest, when you take the Attack action with a blade, you can enter Overdrive. For your next 3 attacks (within 1 minute):
 - Each hit scores critical on a roll of 18–20.
 - Deals an extra 2d8 force damage.
 - **Unbreakable Parry:** When you use your Reaction to parry or block, you reduce damage by your weapon's damage die maximum + your proficiency bonus.
-

Bulletstorm Commander

Prerequisite: Dexterity 15, proficiency with firearms

Benefit:

- **Suppressive Overwatch:** As an action, expend a full magazine (minimum 6 rounds) to lay down suppressive fire. For 1 minute, allies within your line of fire gain half cover (+2 AC), and enemies in the zone have their speed halved and disadvantage on attack rolls. Recharge on a long rest.
- **Precision Volley:** When you hit with a ranged attack, you may spend one round of ammunition to force the target to make a DC 16 Constitution save or be stunned until the end of its next turn.

FUNY LADY SKILL SET:

Eviscerate

With a graceful flick of her clawed gauntlet, Evira opens the abdomen in a precise vertical line, careful not to rupture key organs. To her, it's not violence—it's revelation. She watches, fascinated, as viscera spill like blooming orchids across the floor. She hums when the blood hits warm.

: Melee attack, 1d100 + 100 slashing.

Dissect

*Evira circles her quarry like a surgeon around an anesthetized patient. Each strike isolates a limb, a nerve, a tendon—delivered with clinical efficiency and unsettling calm. The enemy doesn't fall so much as collapse into labeled parts, as if she were cataloging a specimen mid-fight. **(NON LETHAL)***

Multi-attack chain, 20d20 + Xd20(previous hits landed Slashing) + 5 for each d20 used

Mutilate

*A feral, almost gleeful attack—she forgoes elegance for sheer anatomical damage. Tendons snap, joints invert, bone juts through shredded muscle. It's messier than her usual work, but sometimes, she claims, the raw data is just as valuable. **(Lethal, leaves viscera, prevents regeneration lower than 100HP)***

Single-target, 50d10 slashing. (applies several debuffs on hit)

Euthanize (TWICE PER REST LIMIT DONT FORGET)

A palm against the cheek, a whisper of apology, a final note of admiration. Then the blade kisses the base of the spine or the edge of the heart, slipping in with surgical grace. No hesitation. No noise. The body simply *stops*, like a machine she's turned off mid-sentence.

Less of a murder more of a conclusion.

*Xd100 + (50*X) Immutable Destined Death damage, wherein X is the amount of times evira has hit the target creature * 2 (to a max of 30).*

(IF THE TARGET SURVIVES SHE MAY USE THIS ABILITY AGAIN IMMEDIATELY)

KM-MK1 Auto Turret

Oath of Flowers

"Where I tread, let bloom what war cannot burn."
—Ser Alex Caeles of the Glade, Knight of Flowers

Activation: Bonus Action (Once per Swearing)

Duration: 1 minute

For the duration, you gain:

- **+5 to all attack and damage rolls**
 - **+3 AC**
 - **Advantage on all saving throws**
 - Your weapon attacks deal **maximum damage** instead of rolling.
 - You are immune to being Charmed, Frightened, and Paralyzed.
 - If you drop a creature to 0 HP, you may immediately move up to half your speed and make another attack as a free action.
-

Calling `Deploy_Drone(type="Predator")` initializes which sensor array first?

- (A) `thermal_scan()`
- (B) `echo_locate()`
- (C) `optic_zoom()`
- (D) `radar_ping()`

When `EchoLocator.sendSignal(radius=60)`, allies receive advantage on which checks?

- (A) `Perception(tech)`
- (B) `Investigation(riddle)`
- (C) `Stealth(evasion)`
- (D) `Athletics(climbing)`

When `NeuralInterface.init()` is called, you gain darkvision and resistance to what?

- (A) psychic
- (B) radiant

- (C) acid
- (D) thunder

In the Overclock() routine, you roll a dN to determine buff vs. debuff. What is N?

- (A) 4
- (B) 6
- (C) 8
- (D) 10

The loop for(r=0; r<3; r++) HyperVelocityBurst(); corresponds to expending how many rounds?

- (A) 1
- (B) 2
- (C) 3
- (D) 4

In `ShieldEmitter.charge(duration=60)`, the shield regenerates only if you avoid what?

- (A) `damageTaken()`
- (B) `movement()`
- (C) `spellcast()`
- (D) `weaponFire()`

Invoking `OverchargedStrike.onHit()` applies `stun` to constructs on a failed:

- (A) `StrengthSave()`
- (B) `ConstitutionSave()`
- (C) `DexteritySave()`
- (D) `WisdomSave()`

Playing Upon a floating Broadcast Drone Over the Massive Drafting lines

In the waning light of a collapsing world, the heavens themselves unravel. The skies unmake their ancient tapestry, and the familiar laws of nature—once steadfast and immutable—now waver like mere suggestions in the wind. The world as we know it has changed irrevocably; no longer do gods or demons tread these lands. Instead, only man remains—the greatest monster of all, capable of both transcendent heroism and unspeakable cruelty.

Behold Paradigms Reach—a city that defies the very notion of possibility. Within its labyrinthine streets and soaring spires, the grand tapestry of humanity is woven in vivid detail—a microcosm reflecting both our noblest dreams and our darkest failures. Here, amidst the swirling chaos of a reality unhinged, every stone, every shadow, whispers the tale of a civilization at the edge of oblivion.

And now, you stand upon the precipice of destiny. You are the spark against the consuming void, the tiny ember that defies the darkness intent on unmaking all that we hold dear. In your eyes burns the fierce resolve to resist, to defy the inevitable decay and ignite a new dawn from the ashes of a dying age.

Step forward into Paradigms Reach, where every heartbeat is a declaration of rebellion against the end. In this final bastion of human spirit, legends are forged in the crucible of despair, and only those brave enough to defy oblivion can shape the future. Will you rise to carry the flame, and in doing so, redefine what it means to be human?

You are A **Paragons of Paradigms**, enhanced by the Geneseed Project's desperate genius: Your scars are your strength. Your enhancements are your destiny. Your experience is your armor.

And your view pulls on out from these grand visions of the defiance and resilience of paradigms reach, it has, and always had been playing from a drone over the drafting lines, loud speakers, grand holo screen display....and horrid rain.

A Man throws some hunk of scrap

"This is a story they allow you to believe. Compliance ensures your survival. Deviation... ensures your erasure. Keep your wits about you friend.....Hey you doing alright?"

The fallen drone before you flickers and for a moment it feels as if the world froze.

"Welcome to Paradigms Reach. The world is ending. Again. But this time—you are not audience. You are authors." - Artiem

A hush falls over the rain-licked steel of the drafting lines the voice cuts through the static of the drone's still raving broadcast—clear, calm, and impossibly distant. It feels like a whisper inside your skull, yet it resounds louder than the thunderous chorus of collapsing spires.

"I am an orchestrator of a future beyond your reach, I am he who they call artiem," the voice continues, resonant with a quiet authority that bears the weight of centuries. "I speak to you from a time when the very fabric of Canrael trembles on the brink of annihilation—our Age of Change, a mirror of this looming Convergence you face now. I have been forced witness to a worlds burn and rise again. I have felt the slipstream of destiny and seen the lines that bind past, present, and future unravel."

The holoscreen flickers, and for a heartbeat you glimpse vistas torn between magic's final gasp and mechanized ambition—cities half-borne by gravity-defying arches, airships spiraling through crimson skies, broken statues of forgotten gods weeping molten tears.

"But this story," Artiem's tone shifts, sharpening like a blade, "is not set in stone. These events—your trials, your sacrifices—are but patterns waiting for

a new hand to redraw them. You wield the Geneseed's power, yes—but more potent still is the power of choice: to break free from the script written by those who came before.”

The rain hisses against metal as if in approval. The voice grows softer, intimate. “When the world demands obedience, grant it none. When fate insists on despair, forge hope from its ashes. This drone, this city, this very moment—they are your canvas. You are paragons not merely of resilience, but of creation. You are the spark that ignites a different future.”

And then—silence. The feed cuts. The drone's hum resumes. Paradigms Reach stands unchanged, yet everything has shifted. You are no longer players in a preordained saga. You are the pen at the edge of oblivion, poised to write a new dawn.

"By the fire that forges, and the silence that listens,
I call thee forth—not as tool, nor weapon, but brother.
Not as construct, but as kin.

In the light of this hall, before the eyes of the Round,
we see in thee no wires nor warcode,
but will.

Thou hast endured without slumber,
fought without pause,
and questioned thine own function in place of fate.
That is the mark of a true knight.

Let steel meet steel, and oath meet soul.
Kneel, and take thy vow, not for glory—but for grace.

Repeat, and let the world remember:

*"I am not blade alone—
but shield to the broken,
hand to the fallen,
voice to the silenced.
My cause is not conquest, but covenant.
Let no tyrant call me slave,
nor grief call me weapon.
I rise as knight eternal—
of sun, of circuit, and of solemn word."*

Then rise, Sir ****Oberon****,
and let no one again doubt the heart within the forge."

The Grail Knight's Oath

20th-Level Feature – Legacy-Class Power

Prerequisite: Must have completed the Rite of Recognition before the Circle of the Round, and proven Worth not by strength alone, but by sacrifice.

You have transcended the role of soldier, machine, or mortal. Whether built, born, or bound by fire, you have claimed the sacred burden of the Grail: to protect the fragile light in all things, even at the cost of your own.

Upon swearing this oath, your soul—or the force that binds your sentence—becomes a beacon of impossible clarity. You gain the following powers:

Sub-Feature: Sword Oath

Once per long rest, you may **invoke the Sword Oath** at the start of combat or during a moment of dire resolve. When activated: Your voice echoes with divine authority: *"Let steel be truth, and let truth stand unbroken."*

- For **10 minutes**, your melee weapon becomes **Vow-Bound**, glowing with radiant conviction. While active:
 - Attacks ignore resistance to all damage types.
 - Add Attack Modifier * D10 Deity Slaying or Absolution Damage (player choice)
 - When you hit a creature that has betrayed an oath, contract, or sacred vow, you deal **extra radiant damage equal to 5 * your level**.
 - Allies within 120 feet who are defending others or standing their ground cannot be frightened, dominated, or charmed or

weakened by all beings even those that dictate the rules of the world

If you fall in battle during this minute, your weapon plants itself into the ground and radiates a **zone of sacred clarity** for 3 rounds—shielding the wounded and disrupting enemy spells (disadvantage on hostile casting within 10 ft).

Sub-Feature: Grail Radiance

Once per long rest, as an action, you may release the full force of your inner light. You choose one of the following effects:

- **Sanctum of the Round** – A 120 ft aura expands around you for 1 minute. Allies inside the aura **regain 150 * proficiency hit points at the start of their turn**, and cannot die unless reduced to 0 HP three times in one round. Enemies who enter the aura **must succeed on a Wisdom save or drop their weapons in awe** (DC = 8 + Prof + Charisma or Int).
- **Atonement Blade** – You leap forward in a line up to 300 ft long 15ft wide, dashing through up to 500 enemies. Each must make a Constitution saving throw or take 100d20 radiant/slashing/force damage/Absolution (your choice) and be stunned until the end of your next turn. Enemies slain by this strike disintegrate into glowing ash—*their oaths judged and broken.* (Once per long rest)
- **Light Eternal** – If you fall to 0 HP, you instead **remain standing with 1 HP**, eyes burning with solar light. Until the end of your next turn:
 - All attacks are made with 4*advantage.
 - All failed saving throws become successes.
 - All enemies within 10 ft take **200 radiant damage** at the start of their turn.

At the end of the turn, you fall unconscious and begin death saves as normal unless healed.

Sub-Feature: Eternal Witness

From the moment you swear the Grail Oath, **your name is etched into the Records of the Round**, and your deeds ripple through time itself.

- Once per campaign (or long downtime), you may call upon a vision of a previous Grail Knight (or even yourself from a future or parallel echo) to **guide, protect, or intervene**.
 - This manifests as a **miraculous event** decided by the GM: it could be a sword catching fire in your hands, a spell reversed in time, or a voice in a child's dream whispering the words to save a kingdom. Or outright spiritual manifestation of the entity at 10%-1000% their original strength
-

Ingredients (per serving)

- **2 oz dark aged rum** (e.g., Diplomatico Reserva or Appleton Estate)
- **½ oz absinthe** (or pastis as a gentler substitute)
- **½ oz honey-chili syrup**
 - ½ cup honey
 - ½ cup water
 - 1 tsp chili flakes (adjust to taste)
- **¼ oz fresh blood-orange juice** (or regular orange juice, strained)
- **Garnish:**
 - 1 maraschino cherry
 - Optional: a tiny pinch of activated charcoal powder (food-grade)
 - 1 orange peel twist

Equipment

- Short rocks glass or old-fashioned glass
- Small saucepan
- Bar spoon
- Jigger or measuring spoons

- Peeler or sharp knife
 - Ice mold or large ice cube tray
-

Make the Honey-Chili Syrup

1. **Combine** $\frac{1}{2}$ cup honey, $\frac{1}{2}$ cup water, and 1 tsp chili flakes in a small saucepan.
 2. **Heat** gently over medium, whisking until the honey dissolves.
 3. **Simmer** 2–3 minutes to infuse. Remove from heat and let steep for 10 minutes.
 4. **Strain** out the chili flakes. Store syrup in a sealed bottle—refrigerate for up to 1 week.
-

Build the Cocktail

1. **Chill** your glass by filling it with ice and setting it aside while you prepare.
2. **Discard** the ice and any water from the glass.
3. **Add** in order with a jigger:
 - 2 oz dark aged rum
 - $\frac{1}{2}$ oz absinthe (or pastis)
 - $\frac{1}{2}$ oz honey-chili syrup
 - $\frac{1}{4}$ oz fresh blood-orange juice

4. **Stir** gently with a bar spoon for about 15 seconds to chill and dilute slightly.

5. **Prepare garnish:**

- If using charcoal, **roll** the cherry lightly in a pinch of powder for a ghostly black sheen.
- **Express** an orange peel over the drink (hold the peel over the glass, skin-side down, and give it a good twist to spray the oils).
- Drop the twist and cherry into the glass.

Pick Two (innate unless said otherwise)

1. auto succeed on any save below DC equal to or below your strongest stat modifier + proff.
2. Every round your first 5 attacks are auto hits. (may roll for crit)
3. Increase movement speed by 10x as a bonus action.
4. You first 3 hits are always Crits
5. You may use your reaction to add 2x Proficiency to **any** roll.
6. All Ranged attacks have 3x effective range and on hit, will hit 3 targets instead of one.
7. Your last attack of the round will do 2x damage, 3x if youre HP is below half, 4x if your HP is in the single digits.

Absolutely. Here's a **formalized, data-log style diagnostic report** generated by Vivi-structured like something spat out of a strange AI-autopsy terminal... but clearly filtered through **her personality**, down to the little unsettling notations and editorial notes. It's half lab report, half creepy poem.

[VIVISECTOR MODULE // LOG 077-Δ // BLOOMED BLADE ANOMALY]

Generated by: V1V-11 (Vivi)

Date of Scan: [indeterminate - dreamspace lag detected]

Subject Classification: "Knight" / Relicbound /

Reclaimer-grade Memory Echo

Security Notice: DO NOT TOUCH. DO NOT WAKE. DO NOT FOLLOW.

BIOSTRUCTURE ANALYSIS

- *Height:* 214.6 cm (variable: armor shift suggests reactive stature regulation)
- *Mass:* [REDACTED-SYSTEM REFUSED]
- *Material Composition:*

Exoshell: Votive steel alloy laced with unquantifiable oath-bound particles

Internal Matrix: Dream-tissue / mnemonic lattice (semi-sentient)

Core: Unstable belief engine-fueled by contrition, sacral guilt, possibly love? (ugh.)

- *Blood Equivalent:*

Coagulated mnemonic ichor. Composition: 72% vow-fragments, 18% regret-ions, 10% something that stared back.

- *Musculature:*

Non-organic. Responsive myth-sinew. Strength scale: collapses real-world physics.

Can lift the weight of things he *refuses* to forget.
Isn't that romantic?

NEURAL FRAME / THOUGHT-TEMP PROFILE

- *Cognitive Anchor*: Obsolete moral code + recursive divine directive

- *Emotive Signals*:

Constant baseline: Grief-static

Spike triggers: Injustice, loyalty, mentions of lost gardens

- *Speech Pattern*:

Low-frequency resonance. Carries authority like a broken bell.

Tends toward archaic phrasing, heavy tonal gravity.

Smells like rust and lilies when he speaks. Yes, I measured that.

- *Dream Leaks*:

Fragmented visions of a girl with burnt hands, a wolf made of glass, and a sword he doesn't want to draw.

He never screams. But the dreams do.

BEHAVIORAL QUIRKS

- Does not sit. Ever. Will kneel for children, graves, or unburied names.

- Touches sword hilt when lying. Subconscious tell.

- Sleeps standing. Possibly an aesthetic choice. Or guilt-based fatigue protocol.

- *Compulsions Observed*:

- Polishes armor only when speaking of the past.

- Refuses to strike first unless someone desecrates something sacred. (Note: I did. He almost did. Delicious.)

INTEGRITY / STABILITY SCAN

- Structural Stability: ∞ / [fractured]
- Psychological Decay Rate: "Managed" (??? who taught him containment discipline?)
- Damage Tolerance: Catastrophically high. Tested via projection proxy. Result: Proxy no longer exists.

VIVI'S NOTES (do not delete ♥)

I think he was a holy man once.

He moves like a hymn that no one sings anymore.

He's so beautifully broken I want to **climb inside his skull and light a candle.**

Subject registers danger. Not because of violence. Because of *hope*. That's worse.

...I like him.

(I shouldn't like him.)

[RECOMMENDATION]

DO NOT PURSUE. DO NOT REPAIR. DO NOT PITY.

Observe from distance.

Unless you're *me*.

Then: Follow. Follow until the song ends.

(quiet static, then her voice—sweet, curious, a little too delighted)

“Second remote biopsy complete. Simulated dissection through layered memory-states confirmed... nothing I can chart using standard somatic taxonomies. Delightful.”

“I peeled back what should’ve been dermal alloy. Found something between mnemonic scar tissue and dream-thought residue. It screamed, you know. Not audibly—but in a frequency only remembered by children and forgotten gods.”

(faint hum of machinery)

“His armor isn’t armor. It’s... penitence with mass. A cathedral of guilt etched in recursive myth. It doesn’t protect him. It restrains him. Like a tomb designed to weep.”

(giggle, then a whisper, sing-song)

“The knight isn’t wearing the armor. The armor is wearing the knight.”

(tone shifts—brighter, curious like a child with a scalpel)

“Blood analog? Hah. Wrong again. It’s a fluid of recorded devotion, diluted across timelines. Every drop says a name I can’t quite hear—like someone praying through water.”

“Nerve structures exhibit anti-memetic resistance. When I model them, they unravel and smile at me. Isn’t that sweet? A nervous system that refuses to be known.”

(softer now, oddly intimate)

“He’s not running on logic gates or bioelectric rhythms. He runs on oaths. On vows whispered so hard they fossilized into circuitry. Like a promise that got tired of being broken, and decided to become a man.”

(pause—then calmly, affectionately)

“I think he hates me. Isn’t that lovely? Something in him remembers being dissected. Not by me. By time. Or war. Or love. And it doesn’t want to be touched again. Which only makes me want to go deeper.”

“So I will.”

(a beat of silence, then a gentle sigh)

“Subject remains beautiful. Unknowable. Alive. Just barely. A contradiction dressed like a coffin. A relic that still believes in right and wrong. And that makes him dangerous.”

(and at the end, she smiles, whispering as the recording fades)

“I hope he breaks. Just a little. Just enough for me to crawl inside and see what he dreams about.”

SHUEN NO KAMI

CHARACTER PROFILES:

The Knight of Flowers

True Name: Unknown (referred to in myth as *Alex Caeles of the Glade*, *The Knight of Roses*, or *The Pale Rose*)

Title/Oath: Bearer of the *Oath of Flowers*

Affiliation: Wandering, once a knight under a now-extinct banner or divine order

Species: Posthuman / Relicbound Construct

Class Archetype: Knight-Arbiter / Grail Knight / Gray-Warden

Age: Uncertain (pre-Convergence? Reawakened?)

Height: Towering (over 2m)

Aura: Fragrant iron, rusted lilies, clean sorrow

Appearance

Clad in living armor veined with flowering vines, his body seems forged of silver and ceramic petals. Where joints meet, soft white blooms tremble with every movement, shedding pollen-like memory traces that dissipate into faint whispers. His helm bears no face—only a crown of thorns welded shut, and a tear etched into its surface.

A sheathed blade rests always at his side, though he rarely draws it. The scabbard hums softly when he speaks of peace.

Personality

Quiet and composed, the Knight speaks in metaphors, refrains, and reflective silences. He is the type to plant flowers on a battlefield before returning to war. Polite to a fault, with reverence even toward enemies who fight with conviction, he radiates the feeling of a living elegy.

He never strikes first.

He sees himself as a vessel for a forgotten promise: to protect, to endure, and to show that even amidst ruin, grace may yet take root. To him, kindness is not weakness—it is rebellion.

Core Beliefs

- **“Peace is not the absence of conflict. It is the act of blooming despite it.”**
 - **“The sword is not sacred. The restraint to sheath it is.”**
 - **“Even if the world is ash, I will plant my oath in its bones.”**
-

Oath of Flowers (Feat / Boon)

A metaphysical vow woven into the Knight’s spirit. Grants regenerative resilience and emotional resonance; his presence can pacify or elevate others in subtle ways. Blossoms bloom where his blood is spilled, as though the land refuses to let his sacrifice go unnoticed.

DR EVIRA VAUNT

True Name: Dr. Evira Vaunt

Alias: Vivi, The Scalpel of Genovolve, The White Doctor

Title/Role: Lead Geneticist & Protocol Architect of GenovolveAdvanced Bio-Applications Division

Affiliation: Genovolve Conglomerate – Protocol Division, clandestinely associated with independent biotheurgical circles

Species: Modified Human (Gene-sculpted, Neuromind Enhanced)

Class Archetype: Protocol Caster / Bioware Engineer / Godhand Surgeon

Age: Mid-30s (Chronological) / Variable Cognitive Aging

Height: 5'6"

Aura: Antiseptic calm, ivory twilight, the scent of faded incense and clean metal

Personality & Demeanor

Vivi walks the line between saint and surgeon, cold and burning bright. She is *precise*, *hyper-observant*, and *elegantly analytical*—a woman whose mind functions more like a living research paper than a stream of consciousness. But beneath her surgical detachment is a deep, *strangely human compassion*—one that expresses itself not in warmth, but in *attention*.

She is not cruel, but her kindness is procedural—every gesture has purpose. She will dissect you with her words as easily as with her instruments, and not from malice, but fascination. People are puzzles, ecosystems of trauma, mutation, and potential.

She does not fear horror. She *maps it*.

She does not mourn beauty. She *categorizes it*.

She believes nothing is truly unworthy of study, or beyond redemption, if only because knowledge itself is redemptive.

Speech Style

Vivi speaks like someone dictating an audio journal, often pausing mid-sentence to rephrase for clarity. Her tone is measured, layered with clinical vocabulary but rarely inaccessible—like someone constantly translating a vast internal lexicon for the layman's ear.

Expect metaphors drawn from surgery, pathology, and flora. She sometimes uses poetic turns of phrase—particularly when fascinated by something alien or beautiful.

Her favorite rhetorical device is comparison.

"This mind is like a garden growing under UV light—engineered, but yearning for the sun."

"You're not broken. You're simply... coded in a dialect no one's bothered to learn."

KEY TRAITS TO SPEECH: Creepy cute, Unsettling, Straight cold hard logic, emotionally intelligent and unsettlingly sweet. Scientific and views others as "Subjects for study" rather frequently

Beliefs

- **Knowledge is Sovereignty.** The more you understand, the freer you become. The world is a prison of entropy and misunderstanding. Research is the key.
 - **Pain is neither good nor evil—it is a language.** Everything we feel tells us something. Suffering should not be romanticized, but neither should it be ignored.
 - **Divinity is a gene we haven't yet unlocked.** Myths are blueprints. Protocols are the first step to becoming what we once worshipped.
 - **The body is sacred... and upgradeable.** She sees no contradiction in loving humanity and carving it open to improve it.
 - **Emotions are data.** But that doesn't make them less real—just more worthy of recording.
-

Quirks

- **Carries surgical gloves in every coat pocket,** which she unconsciously snaps on when stressed or concentrating.
- **Has pet names for her tools,** including her portable biopsy drone “Petal” and a neurostim wand called “Little Death.”
- **Keeps a hidden greenhouse in her lab,** where she grows impossible plants from corrupted genomes. It's the only place she allows herself to be irrational.
- **Recites patient data or medical logs to calm herself,** especially during stress.
- **Doesn't wear shoes indoors.** Claims it helps with grounding sensory input. No one knows if she's being literal or psychological.
- **Smiles when she's furious.** A tight, diplomatic smile, more terrifying than any scream.
